

AiU Certified Tester in AI (CTAI)

Duration: 03 days

=====

Table of Contents

Chapter 1 - Introduction to Artificial Intelligence

- Artificial Intelligence (AI)

Definition of Artificial Intelligence (AI)

- Types of AI
- Machine Learning (ML)

Definition of ML

- Supervised Learning - Classification and Regression
- Unsupervised Learning – Clustering and Association
- Reinforcement Learning
- Deep Learning (DL)

Deep Learning and the Types of Neural Networks

- Stages of the ML Process

Stages of the ML Process – CRISP-DM Process

- Steps for the Identification of the ML Problem Type

=====

Chapter 2 - Overview of Testing AI Systems

- AI Testing Phases

Offline and Online Testing of AI Systems

- AI vs. Non-AI Testing

Testing of AI systems vs. Traditional (non-AI) Systems

- AI Quality Characteristics

Quality Characteristics for Evaluating AI Systems

- Extended Quality Characteristics Specific to AI

=====

Chapter 3 - Offline Testing of AI Systems

- Data Preparation and Preprocessing

Steps of Data Preparation and Preprocessing

- Data Preparation
- Processing of Unstructured Data (Images)
- Processing of Unstructured Data (Text)
- Data Imputation
- Data Visualization
- Anomaly/Outliers Detection
- Outliers Detection Techniques
- Dimensionality Reduction
- Metrics

Role of Metrics

- Metrics for Supervised and Unsupervised Learning
- Inertia and Adjusted Rand Score
- Support, Confidence and Lift metrics
- Confusion Matrix
- Accuracy, Precision, Recall, Specificity and F1-Score
- RMSE and R-Square
- Model Evaluation

Training, Validation and Testing Datasets

- Underfitting and Overfitting
- Cross-validation methods
- Analytics

Types of Analytics

=====

Chapter 4 - Online Testing of AI Systems

- Architecture of an AI application

Components of an Intelligent Application and their Testing Needs

- Interaction of AI and Non-AI Parts

Linguistic Analysis Test Design Method

- Linguistic Analysis Test Design Method

Testing AI Systems

- Test a Chatbot

=====

Chapter 5 - Explainable AI

- Explainable AI (XAI)

Explainable AI and its Need

- LIME
- CAM for Neural Networks

=====

Chapter 6 - Risks and Test Strategy for AI Systems

- Risks in testing AI

Risks of Testing AI Systems

- Risk of Using Pre-Trained Models
- Risk of Concept Drift (CD)
- Challenges of AI Test Environment
- Test Strategy

=====

Test Strategy for Testing AI Applications

Chapter 7 - AI in Testing

- AI for Software Testing Life Cycle (STLC)

AI for STLC Methods

- AI for Reporting and Smart Dashboards

AI Based Automation tools

- Tools

=====
