

Microsoft SharePoint Modern Experience: Site Basics

In many professional environments, people work collaboratively in teams. Information technology and applications facilitate this by enabling people to easily share, access, edit, and save information. Microsoft® SharePoint® is a platform specifically designed to facilitate communication and collaboration, enabling people to use familiar applications and web-based tools to create, access, store, and track documents and data in a central location. In this course, you will use SharePoint to access, store, share, and collaborate with information and documents.

Course Objectives:

- In this course, you will use a typical SharePoint team site to work collaboratively with other team members. You will:
- Launch a SharePoint site and navigate among the pages and resources provided by the site.
- Use SharePoint lists to track and view information.
- Use document libraries to store and organize documents.
- Find, share, and archive content stored in SharePoint.
- Author documents as a member of a SharePoint team site.
- Use SharePoint workflow automation tools.

Table of contents

Module 1 - Navigating SharePoint Sites

- Launch SharePoint.
- Gain Access to a Site You Didn't Create.
- Navigate Within a SharePoint Site.
- Access SharePoint from Your Mobile Device.

Module 2 - Using Lists to Track Information
