

Cisco Data Center Nexus Dashboard Essentials (DCNDE) v1.0

Course Description

The **Cisco Data Center Nexus Dashboard Essentials** training teaches you how to plan, implement, manage, operate, monitor, and troubleshoot the infrastructure of your data centers using the Cisco Nexus Dashboard platform.

The goal of this training is to provide fundamental knowledge for the Cisco Nexus Dashboard platform. It discusses the components and the structure of the platform, as well as how to plan for the installment and deployment, looking at the physical and virtual resource requirements, licensing, connectivity, cluster size, and software stack. Additionally, you will be acquainted with the Graphical User Interface (GUI) and the different functions to create and manage sites in the Cisco Nexus Dashboard. You will learn how to monitor, troubleshoot, and administer the platform, covering the authentication and authorization of the administrators' access. This training also earns you 26 Continuing Education (CE) credits toward recertification.

How You'll Benefit

This training will help you:

- Gain the needed skills to utilize the Cisco Nexus Dashboard platform
- Boost knowledge for protocols, solutions, and designs to acquire professional-level and expert-level data center roles
- Earn 26 CE credits toward recertification

Who Should Enroll

Personnel seeking professional- or expert-level data center roles

Course Objectives

- Explore the Cisco Nexus Dashboard platform

- Explain Cisco Nexus Dashboard licensing options, cluster connectivity, GUI, software stack, roles, permissions, tech support, troubleshooting, and installation procedure for adding applications
- Perform Cisco Nexus Dashboard firmware upgrades
- Configure Cisco Nexus Dashboard remote authentication
- Monitor Cisco Nexus Dashboard resources
- Describe Cisco Nexus Dashboard Fabric Controller (NDFC) and its dashboards
- Explore the Data Center with Cisco NDFC topology, including customizable templates, deployment, existing network devices, Virtual eXtensible Local Area Network (VXLAN) Ethernet Virtual Private Network (EVPN), Representational State Transfer (REST) Application Program Interface (API), migration, and image, license, and network management
- Describe enhanced Role-Based Access Control (RBAC) for fabric objects

Course Outline

1. Cisco Nexus Dashboard Platforms
2. Cisco Nexus Dashboard Licensing Options
3. Cisco Nexus Dashboard Cluster Connectivity
4. Cisco Nexus Dashboard GUI Overview
5. Cisco Nexus Dashboard Software Stack
6. Cisco Nexus Dashboard Installation Procedures
7. Cisco Nexus Dashboard Firmware Upgrades
8. Application Installation on Cisco Nexus Dashboard
9. Cisco Nexus Dashboard Roles and Permissions
10. Cisco Nexus Dashboard Remote Authentication
11. Cisco Nexus Dashboard Resource Monitoring
12. Cisco Nexus Dashboard Tech Support and Troubleshooting
13. Add Sites to Cisco Nexus Dashboard
14. Explore Cisco Nexus Dashboard
15. Cisco Nexus Dashboard Fabric Controller Overview
16. Cisco Nexus Dashboard Fabric Controller Dashboards
17. Data Center Exploration with Cisco NDFC Topology
18. Cisco NDFC Customizable Templates
19. Image Management Using Cisco NDFC
20. License Management Using Cisco NDFC
21. Enhanced RBAC for Fabric Objects
22. Explore Cisco Nexus Dashboard Fabric Controller
23. Manage the Network with Cisco NDFC
24. Deploying Cisco Nexus Dashboard Fabric Controller
25. Discovering Network Devices with Cisco NDFC
26. Deploy VXLAN EVPN with Cisco NDFC
27. Managing and Monitoring the Data Center with Cisco NDFC

28. Cisco Nexus Dashboard Fabric Controller REST API
29. Cisco Data Center Network Manager to Cisco NDFC Migration
30. Configure and Execute Cisco NDFC POAP
31. Configure VXLAN with a BGP Control Plane

Lab Outline

1. Connect Sites to Cisco Nexus Dashboard
2. Explore Cisco Nexus Dashboard
3. Explore Cisco Nexus Dashboard Fabric Controller
4. Manage the Network with Cisco NDFC
5. Configure and Execute Cisco NDFC POAP
6. Configure VXLAN with a BGP Control Plane
