VMware Workstation Technical Training

Key Topics

- **Installation**

- **Configuration**

- **Administration**

- **Advanced networking options**

- **Troubleshooting**

Overview

This hands-on training course explores VMware™ Workstation, virtual machine software for technical professionals. It covers this product's installation, configuration, administration, and networking options. This course includes practical labs designed to give real world experience in troubleshooting common technical support issues.

Course Objectives

After this course, you will be able to:

- Install VMware Workstation and one or more guest operating systems.

- Install the VMware Workstation Tools.

- Configure various functional virtual environments.

- Create, configure, and troubleshoot various networking configurations within a virtual machine environment.

- Administer computing platforms running VMware Workstation.

Who should attend?

This course is designed for technical professionals, technical support personnel, and systems engineers who need to utilize VMware Workstation and/or provide technical support to users of VMware Workstation.

Prerequisites

- Linux and Microsoft® Windows® operating system experience.

Pricing

- $600 per student for open enrollment classes

- $6,000.00 plus travel and incidentals for an on-site class of up to 12 students. Customer must provide classroom and equipment.

DETAILED COURSE OUTLINE

MODULE 1 *Product Overview*
- Technology
- Features and functionality
- Technical support proces

MODULE 2 *Architecture*
- Technology
- Architecture

MODULE 3 *Installation*
- System requirements
- Installation
- Create and install a virtual machine
- Installation of VMware Tools

MODULE 4 *Configuration*
- Configuration menus and tools
- Suspend and resume operation
- Configuration editor

MODULE 5 *Cloning and Moving Virtual Machines*
- What is a virtual device?
- Hard disks and their modes
- Other available devices

MODULE 6   *Virtual Networking*
- Host only, NAT, bridged and custom networking
- Connecting multiple networks

MODULE 7 *Administration*
- Important files
- Maintenance topics
- Isolation and encapsulation
- VMware Tools
