

Hydrogen Workshop

DAY 1

What is Hydrogen and Hydrogen Economy

Hydrogen and its principle

Different types of Hydrogen

Hydrogen production pathways

Why Hydrogen and its benefits?

Why do we need the shift toward Hydrogen?

Why is Hydrogen the next big thing?

DAY 2

Recent Developments in the Hydrogen Industry

Why now?

These developments changed the hydrogen concept

Limitations in Hydrogen economy

What has created the shift?

What is the next step?

DAY 3

How Can We be Ready for this Shift?

Definition of the hydrogen economy and what is the big shift

In which areas the shift is happening?

Required tools and techniques to be ready for this shift

The true cost associated with change and how we can reduce it

How can we be ready?

DAY 4

New Approach

What is the focus point?

Can we look at hydrogen production and usage differently?

Does hydrogen production and usage are two different steps?

Innovations in this area

Areas with the limited player and significant opportunities

DAY 5

Case Studies and Lessons

What have they done differently?

Lessons and can we replicate that?

Principles for a successful shift

Should we change our processes?

Are we ready?
