

Introduction to Oracle Application Express (APEX101)

Duration : 5 Days(40 hours)

Required Prerequisites

- SQL
- PL/SQL

Table of Contents :

1. Introduction to APEX

- What is Oracle Application Express (APEX)?
- History of APEX
- Why Use APEX?
- Architecture and Components
- Main Programming Languages in APEX
- User Roles in the APEX Ecosystem
- APEX Deployment Options
- The APEX Hierarchy
- Log in to the APEX Workspace (Exercise)

2. SQL Workshop

- Components of SQL Workshop
- Query Builder
- Selecting Data from a Single Table

- Joining Tables
- Creating Queries in Query Builder from Graphical Representation (Exercise)
- Creating Queries in Query Builder from Report (Exercise)

3. Applications

- App Builder Areas
- Creating An Application (Exercise)
- Options for Creating an Application
- Best Practice: Create the Oracle Data Model

4. Pages

- Page Designer Overview
- Create An About Us Page (Exercise)
- Page Designer: Left Pane
- Page Designer: Right Pane
- Page Designer: Central Pane
- Breadcrumbs and Navigation
- Understanding Layout
- Designing the About Us Page (Exercise)

5. Regions

- Working with Regions
- Creating Regions on a Page (Exercise)

6. Classic Reports

- Classic Reports Overview
- Creating A Classic Report (Exercise)
- Classic Report Attributes
- Alternative for Creating a Classic Report Page

7. Forms

- Basic Functionality of a Form
- Browsing Records in a Table
- Create a Form to Browse Employees (Exercise)

8. Interactive Reports

- Features of Interactive Reports
- Create Departments Interactive Report (Exercise)
- Using Drill Downs (Exercise)

9. Items

- The ABCs of Items
- Layout Properties
- Building a Dynamic Countries Form with APEX Items (Exercise)
- Dynamic Department Filtering with APEX Checkboxes (Exercise)

10. Buttons and Sessions

- Button Actions
- Session State Management
- Exploring Session Management and Redirection in APEX (Exercise)

11.Computations

- Application Computations vs. Page Computations
- Calculate Employee Benefits Contribution
- Create a Computation (Exercise)

12.Validations

- Validations Overview
- The Sequence of Events During Page Submission
- Create Validations (Exercise)

13.Processes

- Application Processes vs. Page Processes
- Page Processes
- Creating Insert and Delete Processes (Exercise)

14.Branches

- Understanding Branches in Oracle APEX
- Create Departments in Country Branch (Exercise)

15.Using Plug-ins

- Plug-in Basics
- Using a Plug-In (Exercise)
- Best Practice: Choose Your Plug-ins Wisely

16.Calendars

- APEX Calendar Features

- Using a Calendar For Employee Hire Date (Exercise)

17.Dynamic Actions

- Types of Dynamic Actions
- Creating and Using Dynamic Actions (Exercise)
- Adding Check and Uncheck All Buttons (Exercise)

18.Security

- Session State Protection
- Understanding Authorization Schemes
- Hashing
- Creating Authentication and Authorization Schemes (Exercise)
- Best Practice: Build to be Secure

19.Deployment

- What is Deployment?
- Deployment Strategies
- Exporting and Importing Applications
- Exporting and Importing an Application (Exercise)

20.Team Development

- Team Development Overview
- Creating an Issue in Team Development (Exercise)
