MS-4010
Build Plugins and Connectors for Microsoft Copilot for Microsoft 365

This training course is designed to help you understand the extensibility options available for Microsoft Copilot for Microsoft 365. You will learn about the different ways to extend Copilot, including building plugins and connectors, and how to choose the right option for your use case. The course also covers best practices for building high-quality plugins and connectors, as well as data, privacy, and security considerations. Whether you are a pro-code or low/no-code developer, this course will help you chart your path to extending and customizing Copilot for Microsoft 365.

Prerequisites

- Familiarity with Microsoft 365, Microsoft Copilot for Microsoft 365, and Microsoft Teams

- Familiarity with Visual Studio Code and the Teams Toolkit

- Familiarity with TypeScript, JavaScript, .NET, and/or C#
