

# NetApp BlueXP Fundamentals

**Prerequisites:** Introduction to NetApp BlueXP

**Duration:** 1 Day (8 Hrs/Day)

**Course Objective:** Discover how you can efficiently manage your hybrid multicloud infrastructure with NetApp BlueXP. Explore the BlueXP features designed to enable seamless management of Cloud Volumes ONTAP, Azure NetApp Files, Cloud Volumes Service, Amazon FSx for ONTAP, and NetApp on-premises systems and ONTAP environments. Additionally, gain insights into the extensive capabilities, services, and management console integrations within BlueXP to enhance your overall cloud management experience.

**Lab Requirement:** Koenig DC

## **Module 1 – BlueXP Overview**

NetApp BlueXP

BlueXP: Hybrid Multicloud Management Made Easy

BlueXP Capabilities

BlueXP Administration Services

Getting Started with BlueXP

Accessing BlueXP

Support Case Management

## **Module 2 – Manage Storage Resources**

BlueXP Canvas

BlueXP Connectors and Rest APIs

BlueXP: Deployment Location
