Microsoft Teams Rooms Technical Solutions Professional

This course provides a comprehensive understanding of Microsoft Teams Rooms, covering everything from the basics of hybrid meetings to the deployment and management of Teams Rooms. Participants will learn how to ensure network readiness, design meeting spaces, create and manage resource accounts, and adopt advanced features. The course also delves into security considerations, device management with Conditional Access and Intune, and the Teams Rooms Pro Management portal.

Required Prerequisites

- Basic knowledge of Microsoft 365 and Teams administration.
- Familiarity with network fundamentals and device management.
