

Realizing the Power of Jira Reporting and Dashboards

- Live Team Training

Duration: 8 hrs

Course Objective: This course will bring a live expert to show your team dashboard best practices and pitfalls — including how to ensure your team’s reporting reflects the right metrics (like health, progress, and status) at the right time. Your team will also learn how to read Jira Software reports, configure a wallboard, and create a multi-project dashboard.

Pre-Requisite: Before taking this course, your team should complete [Jira Essentials with Agile Mindset](#) or be familiar with topics including navigation, viewing boards and issues, Jira workflows, Jira filters, and using the advanced JQL editor to enter filter queries.

Lab Details: Free Trail of JIRA Cloud

Topics Covered

Course Overview

Jira Software Reporting

Creating Jira Dashboards
