

Atlassian Cloud Organization Administration

- Live Team Training

Duration: 4 hrs

Course Objective: Everything your team needs to get started managing Atlassian accounts of your employees and the products that belong to your organization is right here. A live instructor will show your team how to add users and manage them without making potentially costly mistakes – like using up too many license seats, or worse, unauthorized data access. Your team will also gain an understanding of more advanced features if you have Atlassian Cloud Premium.

Pre-Requisite: Before taking this course, it would be useful for your team to understand user administration, but it's not required.

Lab Details: Free Trail of JIRA Cloud
