Jira and Confluence Together Live Team Training

Duration: 8 hrs

Course Objective: In this course, a live instructor will show your team how to use Jira and Confluence together as a seamless single source of truth for projects: combining Confluence for knowledge management and Jira for work management. Your team will be able to identify the value in using Jira and Confluence together, link Jira issues and Confluence pages, create Jira issues from Confluence, manage product requirements, and report on Jira projects in Confluence.

Pre-Requisite: **Before taking this course,** we suggest your team completes Jira Fundamentals, Confluence Fundamentals, or has equivalent experience.

Lab Details: Free Trail of JIRA Cloud

Topics Covered

Course Overview
