Jira Automation Live Team Training

Duration: 8 hrs

Course Objective: This live course will give your team a solid foundational understanding of the building blocks of rules, including triggers, conditions, actions, branch rules, and smart values. This foundation can be used as the basis for **creating their own rules.** They'll also learn how to integrate Jira with other tools like Slack, email, Bitbucket, GitHub, and any webhook-enabled services.

Pre-requisite: Before taking this course, we suggest your team completes Jira Essentials with Agile Mindset or has equivalent experience.

Lab Details: Free Trail of JIRA Cloud
