

Siemens SCADA Systems: Mastering WinCC Advanced Configuration and Administration

Course Description:

This course is designed to provide an in-depth understanding of Siemens SCADA systems, with a focus on WinCC Advanced. Participants will explore the architecture, configuration, and administration of WinCC Advanced, covering essential aspects such as data acquisition, communication, and visualization. The course includes practical sessions on project creation, basic and advanced configurations, alarm management, data logging, trend configuration, recipe management, and user administration. Hands-on exercises are integrated to ensure participants gain the skills necessary to efficiently manage SCADA systems using WinCC Advanced.

Audience Profile:

This course is intended for automation engineers, system integrators, and IT professionals responsible for deploying and maintaining Siemens SCADA systems, particularly those using WinCC Advanced. It is also suitable for individuals aiming to specialize in WinCC Advanced for industrial automation projects.

Prerequisites:

Participants should have a foundational understanding of industrial automation, familiarity with Siemens PLCs, and a general knowledge of SCADA systems. Experience with industrial networks and basic programming concepts is beneficial but not required.

Course Objectives:

By the end of this course, participants will be able to:

- Understand the architecture and core functions of Siemens SCADA systems, with a focus on WinCC Advanced.
- Create and manage SCADA projects using WinCC Advanced, including device integration and network communication.
- Configure both basic and advanced features within WinCC Advanced, such as graphic views, alarms, data logging, and trend analysis.
- Manage recipes and user administration within WinCC Advanced, ensuring secure and efficient operation.
- Apply practical skills through hands-on exercises in configuring and managing SCADA systems with WinCC Advanced.

Table of Contents (TOC):

Module 1: Introduction to Siemens SCADA Systems

- SCADA Overview
- What is SCADA?
- Functions of SCADA
- Example of Siemens SCADA Architecture
- Data Acquisition and Communication
 - Data Acquisition Methods
 - Data Communication in SCADA Systems
 - Data Presentation and Visualization
- Comparison of PLC and PC
- Examples of SCADA Applications

Module 2: Project Creation & Basic Exercises in WinCC Advanced

- Creating a SCADA Project in WinCC Advanced
- Adding Devices to the Project
- Establishing Communication Connections
- Setting Ethernet Addresses
- Connecting to Non-Integrated PLCs
- Runtime Settings Configuration
- Configuring Buttons and Outputs in WinCC
- Basic Exercises with Push Buttons and Displays

Module 3: Basic Configuration in WinCC Advanced

- Configuring Graphic Views
- Setting Up Text Displays
- Alphanumeric Display for Inputs and Outputs
- Configuring Text and Graphic Lists
- Movement and Fill Properties

Module 4: Alarm Configuration in WinCC Advanced

- Steps in Alarm Configuration

- Message Blocks for Alarms
- Alarm Classes
- Discrete Alarm Trigger Settings
- Displaying Alarms in WinCC
- Alarm View Properties
- Practical Exercises on Alarm Configuration

Module 5: Data Logging & Trend Configuration in WinCC Advanced

- Types of Process Value Logging
- Configuring Data Logs in WinCC
- Process Value Log Properties
- Editing Logging Tags
- Displaying Data Log Trend Views
- Properties of Trend Views in WinCC
- Practical Exercises on Data Logging and Trend Configuration

Module 6: Recipe Management in WinCC Advanced

- Recipe Structure in WinCC
- Communication with Controllers using Tags
- Table Representation of WinCC Recipe View
- Sorting in the Recipe View
- Exporting Recipe Data
- Configuring Recipe Views in WinCC
- Entering and Editing Recipe Data
- Recipe Editor Configuration
- Setting Recipe Properties
- Practical Exercises on Recipe Management

Module 7: User Administration in WinCC Advanced

- User Administration Structure in WinCC
- Access Protection Mechanisms
- Configuring User Administration

- Structuring User Authorizations
- Creating Authorizations in WinCC
- Assigning Authorizations to Objects
- Configuring User Groups in WinCC
- Configuring Users in WinCC
- User View Configuration
- Login Dialog Configuration in WinCC
- Displaying Logged-On Usernames
- Practical Exercises on User Administration
