

SailPoint IdentityNow

Summary: - Formats: **Instructor-Led Training**

- Length: 3 Days (24 Hours)

Overview:

During this three-days course, you focus on how to implement and extend IdentityNow, the core platform of SailPoint's Identity Security Cloud solutions. Learn to maintain the system and manage key features such as access management, reporting, certifications, and more. In this course, students will learn about IdentityNow, a cloud-based identity and access management solution. IdentityNow shares a foundation with Identity Security Cloud.

Objectives: After completing this course, you should be able to:

- Describe the role of a tenant and virtual appliance
- Explain the difference between authoritative and non-authoritative sources.
- Describe the purpose of Roles, Access Profiles, Identity Profiles, Access Requests, and Entitlements

Intended Audience:

- Platform Administrators responsible for a production system
- Implementers and developers responsible for configuring and implementing IdentityNow

Prerequisites:

- None
