

TADM10: Technical Implementation and Operation I of SAP S/4HANA and SAP Business Suite

Course Description:

This course covers the technical implementation and operational aspects of SAP S/4HANA and SAP Business Suite. Participants will gain essential knowledge on system configuration, user and authorization management, SAP Fiori implementation, SAP system monitoring, and troubleshooting. With a focus on hands-on experience, this course prepares system administrators and technology consultants to manage and configure SAP systems effectively, enabling successful technical operations.

Audience Profile:

- System Administrators
- Technology Consultants

Prerequisites:

Essential: None

Recommended: None

Course Objectives:

By the end of this course, participants will be able to:

- Use front-end tools to navigate in SAP systems.
- Understand and manage SAP kernel processes.
- Configure and maintain SAP systems for technical operations.
- Implement and configure SAP Fiori applications.
- Manage users and authorizations within the system.
- Start, stop, and configure SAP systems.
- Configure components for HTTP-based communication, including SAPconnect and SMTP.
- Monitor and troubleshoot SAP system performance.

Table of Contents (TOC):

1. **SAP Portfolio Overview**
2. **Navigation**
3. **SAP System Kernel**
4. **Software Development**
5. **Users and Authorizations**
6. **Communication and Integration Technologies**
7. **SAP Fiori Foundation**
8. **System Monitoring and Troubleshooting**
9. **Starting and Stopping**
10. **System Configuration**
11. **Technology Components for HTTP-based Communication**
12. **SAP Fiori Infrastructure and App Implementation**
13. **SAPconnect and SMTP**
