

ISO 31000 Lead Risk Manager

Course Duration: 40 Hours (5 Days)

Overview

The ISO 31000 Lead Risk Manager course is designed to provide comprehensive training on risk management best practices and the ISO 31000 standard. This course equips learners with the knowledge and skills to effectively manage risks within an organization by adhering to the globally recognized ISO 31000 risk management guidelines. Through various modules, participants will understand the risk management process, establish a risk management framework, identify and assess risks, and implement Risk treatment strategies. Learners will gain expertise in the principles and core elements of ISO 31000, becoming proficient in managing risks across different functions of an organization. This ISO 31000 risk management certification ensures that participants can confidently handle dynamic business environments, optimize costs, and align risk management with business strategy. By the end of the course, participants will be prepared to take the ISO 31000 Risk Manager certification exam, validating their competence as a lead risk manager in a wide array of industries.

Course Syllabus

To ensure the best possible learning experience and success in the ISO 31000 Lead Risk Manager course, the following minimum prerequisites are recommended:

- Basic understanding of risk management concepts and principles.
- Familiarity with the ISO 31000 standard is advantageous but not essential.

- Professional experience in a risk management role or related field is helpful.
- Ability to comprehend and analyze complex business processes and scenarios.
- Good communication and analytical skills to participate actively in discussions and exercises.
- Proficiency in the language in which the course is being taught (e.g., English).
- These prerequisites are designed to establish a foundational knowledge base from which the course content will build upon. They are not intended to be barriers to entry but rather to ensure that participants can keep pace with the course material and fully engage with the subject matter.

Why should you attend?

The ISO 31000 Lead Risk Manager training course helps participants develop their competences to support an organization create and protect value by managing risks, making decisions, and improving performance using the ISO 31000 guidelines. It provides information regarding the core elements and the effective implementation of a risk management framework, the application of the risk management process, and the actions necessary for the successful integration of these elements to meet organizational objectives. Furthermore, it provides guidance on the selection and application of techniques for assessing risks in a wide range of situations.

Upon completion of the training course, participants can sit for the exam and apply to obtain the “PECB Certified ISO 31000 Lead Risk Manager” credential. The credential demonstrates that the participant possesses the theoretical and practical knowledge and professional capabilities to support and lead risk management processes based on ISO 31000 guidelines and best practices in this field.
