

Cortex XSOAR Automation and Orchestration

Scope

- Level: Advanced
- Duration: 4 days
- Format: Instructor-led training
- Platform support: Cortex XSOAR server

Prerequisites

Participants must complete the Cortex XSOAR Analyst digital learning. Participants who have experience with scripting, the use of Python and JavaScript, and the use of JSON data objects will likely be able to apply what they learn more quickly than participants without such experience. However, completion of the course does not require proficiency in writing code.

Course Modules

- 1 – Introduction to Core Functionality and Feature Sets
- 2 - Enabling and Configuring Integrations
- 3 – Working with Playbook Development
- 4 – Working with Classification and Mapping
- 5 – Working with Layout Builder
- 6 – Working with Solution Architecture
- 7 -Using Docker
- 8 – Working with Automation Development and Debugging
- 9 - The Marketplace and Content Management
- 10 – Working with Indicators and Threat Intelligence Management
- 11 – Working with Jobs and Job Scheduling
- 12 – Working with Users and Role-Based Access Controls (RBAC)
- 13 – Using Integration Development
