

Articulate Storyline 360 fundamentals

Duration: 40 Hours (5 Days)

Overview

The Articulate Storyline 360 fundamentals course is designed to equip learners with the essential skills to create interactive eLearning courses using Articulate Storyline 360. Participants will learn how to start projects, enhance their content with Themes and Master slides, and import existing PowerPoint presentations to streamline the course development process. The course delves into adding interactivity through buttons, layers, and text entry fields, and covers more advanced features such as Triggers, Hotspots, Variables, and Gamification techniques. Learners will gain hands-on experience with creating Conditional Triggers, managing Variables, and incorporating gamification elements like Scoring and Media control to engage learners. By completing this training, participants will be well-prepared for the Articulate 360 Certification, demonstrating their proficiency in creating dynamic and interactive eLearning content with Articulate 360. This course is ideal for instructional designers, educators, and anyone interested in eLearning development.

Audience Profile

The Articulate Storyline 360 fundamentals course equips learners with core skills for creating interactive eLearning content.

Instructional Designers

eLearning Developers

Corporate Trainers

Content Developers

HR Professionals involved in training

Educators and Teachers
