- Module 1: Introduction to OIC** **23**
 - OIC Overview 24
 - Oracle Integration 3 25
 - Process Automation 26
 - Visual Builder 29
 - File Server 32
 - B2B 34
 - Integrations 35
 - Oracle Integration 3 Editions 38
 - Oracle Integration 3 39
 - Process Automation Overview 40
 - Integrations Feature Overview 41
 - Defining OIC Terminology 42
 - Integrations Feature 49

Integrations Feature Use Cases	62
Integration Patterns	63
Use Cases	70
Application-to-Application Integration	71
Automating Business Workflows	72
Real-time Data Synchronization	73
Extending Applications	74
Legacy Systems Integration	75
Unified Support Ticketing System	76
Data Migration	77
IoT Integration	78
Elements of an Integration	79
Integration Flow	80
Understanding OIC Service Roles	86
OIC Service Roles	87
Using Integration Projects	95
About Projects	96
Adding a New Project	97
Determine Project RBAC Permissions	98
Project Views	99
Project Sections	100
Reasons to use Projects	114
Demo: Using Projects	115
Getting Started With Integrations	116
Integration Development Workflow	117
Example Use Case	119
Integration Development Workflow	120
Module 2: Adapters & Connections	125

Understanding Adapters & Connections	126
Review: What is an OIC Integration?	127
What is an OIC Adapter?	128
Design-Time Adapter Configuration Wizard	129
OIC Adapters	130
Creating Connections	132
Creating vs. Configuring a Connection	133
Creating Additional Connections	134
Creating a Connection Workflow	135
Select an Adapter	137
Creating a Connection Workflow	138
Provide Basic Information	139
Creating a Connection Workflow	140
Adapter Examples	141
Demo: Connection Sharing Between Projects	142
Connection Sharing Between Projects	143
Connection & Security Properties	144
Connection & Security Properties - Part One	144
Creating a Connection Workflow	145
Adapter Examples	146
Defining Connections	147
Adapter Examples	159
Connection & Security Properties - Part Two	160
Adapter Examples	161
Defining Connections	162
Creating a Connection Workflow	175
Connection Testing	176
Defining SOAP Adapter Connections	177

- Defining SOAP Adapter Connections - Part One 177
 - Use Cases 178
 - SOAP Adapter Invoke Connections 179
 - Defining Connections 180
 - Use Cases 183
 - Defining SOAP Adapter Connections - Part Two 184
 - Use Cases 185
 - SOAP Adapter Trigger Connections 186
 - Defining Connections 188
- Defining REST Adapter Connections 190
 - Use Cases 191
 - REST Adapter Invoke Connections 192
 - Defining Connections 193
 - REST Adapter Trigger Connections 203
 - Defining Connections 204
- Connecting to Private Resources 205
 - Accessing Private Resources 206
 - Connecting to Endpoints Located in a Private OCI VCN Subnet 207
 - Private Endpoint Adapter Support 208
 - Configuring a Private Endpoint for an OIC Instance 209
 - Connecting to Endpoints Located in a Private OCI VCN Subnet 210
 - Connecting to Endpoints Located in any Private Cloud 211
 - Connecting to Endpoints Located On-Premises 212
 - Connectivity Agent Adapter Support 213
 - Differences between a Private Endpoint and Connectivity Agents 214
- Connectivity Agent Architecture 215
 - Public Internet Pattern 216
 - FastConnectPublic Peering Pattern 217
 - Private Peering Pattern (Agent Deployed On-Premises) 218

Private Peering Pattern (Agent Deployed in OCI VCN)	219
Agent Deployment	220
Agent Runtime Behavior	221
Scenario 1: Your databases/applications are running on-prem behind a firewall	222
Scenario 2: Your databases/applications are running on the cloud	223
Scenario 3: Configuring Agents for High Availability (HA)	224
Scenario 4: Configuring HA Agents for HA Application/Database	225
Module 3: Configuring Connections	227
Configuring Trigger Connections	228
Message Exchange Patterns	229
Implementing a Message Exchange Pattern	230
Integration Development Workflow	231
Integration Patterns	233
Trigger Scenarios	235
Adapter Examples	236
Configure Basic Info Page	237
Configure Request Page	238
Adapter Configuration Details	241
Integration Design Canvas	242
REST Trigger Configuration	245
Use Cases	246
Trigger Connection Options	247
Multiple Operations	262
Trigger Connection Options	263
Demo: REST Trigger Configuration	264
Demo: SOAP Trigger Configuration	266
Defining Connections	267
Database Trigger Configuration	270

Database Trigger Adapter Role Concepts	271
Supported Database Systems	272
Trigger Configuration	273
Supported Database Systems	279
ERP Cloud Trigger Configuration	280
Trigger Request Page Options	281
Receive Business Events raised within ERP Cloud	282
Receive Callback Event upon Completion of FBDI Bulk Import Job	285
Defining Connections	287
Trigger Request Page Options	292
Demo: ERP Cloud Trigger Configuration	293
Trigger Request Page Options	294
Configuring Invoke Connections	295
Integration Development Workflow	296
Use Cases	298
Integration Design Canvas	299
Adapter Examples	305
Configure Basic Info Page	306
Configure Actions Page	307
Configure Operations Page	308
Adapter Configuration Details	310
Demo: REST Invoke Configuration	311
Database Invoke Configuration	315
Database Invoke Adapter Role Concepts	316
Supported Database Systems	317
Invoke Configuration	318
Invoke a Stored Procedure	319
Run a SQL Statement	321

Perform an Operation On a Table 323

Supported Database Systems 328

ERP Cloud Invoke Configuration 329

 Configure Actions Page Options 330

 Query, Create, Update or Delete Information 331

 Import Bulk Data into Oracle ERP Cloud 336

 Send Files to ERP Cloud 339

Table of Contents

- Module 4: Data Transformation** **13**
 - Map Editor Overview 14
 - Integration Development Workflow 15
 - Map Editor 16
 - Accessing the Map Editor 17
 - Mapping Canvas 18
 - Using the Map Editor - Part One 21
 - Map Editor 22
 - Expression Builder 26
 - Using Set Text Mode & Entering Literal Values 27
 - Map Editor 28
 - Using the Map Editor - Part Two 29
 - Map Editor 30
 - Node Information 31
 - Developer Toggle Button 33
 - Filter Options 34
 - Search Data Fields 37
 - Use Element Node Context Menu 39
 - Troubleshoot Errors 41
 - Working with Functions, Operators, and XSLT Statements 43
 - Map Editor 44
 - Working with Functions 45
 - Working with Operators 48
 - Working with XSLT Statements 51
 - Create Conditional Mappings 53

Create for-each StatementsAutomatic creation	54
Set Default Values in the Mapper	55
Work with Multiple Value Statements	56
Perform a Deep Copy of Elements with a copy-of Constructor	57
Editing XSLT Code	59
Edit XSLT Code in the Map Editor	60
Edit XSLT Code in Oracle JDeveloper	63
Creating and Using Lookups	69
Integration Flow	70
Creating Lookups	73
Updating Lookups	75
Using the lookupValueFunction	78
Viewing Lookups In Use	84
OIC Lookup Use Cases	85
Variables, Integration Properties, and Schedule Parameters	87
Overview of the Elements	88
Global Variables	90
Assigned Variables	93
Scoped Variables	96
Integration Properties	98
Schedule Parameters	102
SummaryComparisons	103
Module 5: Using Integration Actions	105
Actions Overview	106
Overview	107
Adding Actions	108
Configuring the Action Logic	110
Actions	112

Data Stitch Action	120
Stitch	121
Data Stitch Action Operations	122
Capability Comparisons	126
Assign to a Global Variable	127
Append to a Global Variable	129
Demo: Data Stitch Action	130
Using the Data Stitch Action in an Integration Orchestration	131
Integration Flow	132
Append to a Global Variable	133
Using the Data Stitch Action in an Integration Orchestration	134
Looping Actions	135
Similarities	136
While Action Considerations	137
Use Cases	139
For-Each Action Considerations	140
Use Cases	142
Differences	143
Demo: Using the While Action	144
Demo: Using the For-Each Action	145
Demo: Using the Switch Action	146
Demo: Using the Parallel Action	147
Using the Scope Action	148
Scope	149
Integration Flow	151
Scope Context Considerations	152
Integration Flow	154
Demo: Using the OCI Function Action	155

Demo: Using the OCI Object Storage Action	156
Using the OCI Object Storage Action	157
Wait Action	158
Wait	159
Wait Action Usage	161
Demo: Wait Action	166
Wait	167
Note Action	168
Note	169
Configuring the Note Action	173
Module 6: File Processing	175
File Handling Fundamentals	176
Virtual File System	177
Receiving / Retrieving Files	178
Writing / Sending Files	179
Processing Files	180
Structured Versus Opaque Files	181
Defining FTP & File Adapter Connections	182
Invoke Role Use Cases	183
Trigger Role Use Cases	184
FTP Adapter	185
Defining Connections	186
Comparing File and FTP Adapters	194
Configuring FTP and File Adapter Connection Operations - Part One	195
FTP & File Operations	196
Configuring FTP and File Adapter Connection Operations - Part Two	204
FTP & File Operations	205
Configuring File Server Action Operations	218

FTP Adapter vs. File Server Action	219
File Server Action Operations	220
Demo: File Server Action	228
Configuring Stage File Action Operations - Part One	229
Processing Files	230
Stage File Action	231
Stage File Action Operations	232
Configuring Stage File Action Operations - Part Two	242
Stage File Action Operations	243
Transforming Native File Formats	257
Defining Structured Files	258
File Definition Wizard	260
How to Read/Write Other Native File Formats?	264
Create a Native XML Schema (nXSD) File	265
Defining Structured Files	273
Module 7: Error Handling	275
Designing Beyond The Happy Path	276
OIC Error Hospital	277
Designing Beyond the “Happy Path”	281
Implementing the Global Fault Handler	290
Default Global Fault Handler	291
Entry to the Global Fault Handler	293
Fault Handling Logic	294
Global Fault Handler End Actions	297
Handling Runtime Errors	304
Scope Fault Handlers	305
Additional Fault Handlers	307
Catching Faults	311

Implementing Fault Handlers	314
Scope Fault Handler End Actions	318
Fault Mitigation	319
Throw New Fault Action	320
Leveraging the Throw New Fault Action	321
Configuring the Action	322
Skip Condition Considerations	324
Fault Handling Best Practices	327
Handle Faults in Dedicated Fault Handlers	328
Add Logic in the Global Fault Handler	329
Design Error Handling Integrations	330
Establish a Monitoring Strategy	331
Leverage Processes for Manual Intervention	332
Resubmitting Failed Instances	333
Use cases that will require extended strategies:	338
Parking Lot Pattern	339
File-based Reprocessing Pattern	340
Module 8: Additional Integration Topics	341
About Packages and Projects	342
Integrations Feature	343
OIC Packages	344
OIC Packages & Projects	345
Key Differences Between Packages & Projects	346
Converting a Package to a Project	347
Demo: Working with Projects	348
Demo: Viewing Project Dependencies	349
Integration Lifecycle Operations	350
Integration Status	351

Activating Integrations	352
Modifying the Tracing Level	353
Deactivating Integrations	354
Cloning Integrations	355
Integration Versions	356
Handling Locked Integrations	358
Demo: Integrations Observability	360
Demo: Integration Instance Tracking	361
Demo: Publishing an Integration Endpoint to OCI API Gateway	362
Demo: Using Events for Decoupling Integrations	363
Demo: Using Events in Projects	364
Defining Schedules	365
Integration Patterns	366
Schedule Integrations	367
Creating a Schedule	368
Defining an Advanced Schedule	372
Starting the Schedule	374
Using Schedule Parameters	376
Coordinating Multiple Scheduled Runs	377
Creating Schedule Parameters	379
Using Schedule Parameters	380
Overriding Schedule Parameter Values	382
Managing Schedule Integration Runs	384
Initiating an Integration Run Schedule	385
Managing Integration Schedules	386
Initiating an Integration Run Instance	387
View the Status of Submitted Integrations	389
Monitoring Integration Runs	391

Monitoring Integration Runs	392
Resubmitting Failed Runs	395
Scheduled Integrations REST Endpoints	399
Demo: Using OIC Recipes	400
Demo: Using Accelerators	401
Accelerators Extensions and Versions	402
Demo: Installing, Extending, Testing, and Exporting an Accelerator	403
Demo: B2B Feature Overview	404
Demo: B2B XSD & Documents	405
Demo: B2B Trading Partner Transports	406
Demo: B2B Trading Partner Agreements	407
Demo: B2B AS2 Connections	408
Demo: B2B REST Protocol Support	409
Demo: B2B RossetaNet Protocol Support	410
Demo: B2B Resubmit Options	411
Demo: B2B Fixed Length Documents	412
Module 9: OIC Administrator Tasks	413
Demo: Provision an OIC Instance	414
Provisioning an OIC 3 Enterprise Edition Instance	415
Demo: Assigning OIC Service Roles	416
Installing a Connectivity Agent	417
Workflow For Using the Connectivity Agent	418
Create an Agent Group	420
Download the Agent Installer	421
Download the Agent Group Config	422
Prepare to Run the Agent Installer	423
Execute the Agent Installer	424

Post-Installation: Examining the Files	425
Agent Monitoring	426
Restarting the Agent	427
Associating the Connection with the Agent Group	428
Workflow For Using the Connectivity Agent	429
Demo: Installing and Managing the Connectivity Agent	430
Requires ServiceAdministrator Role	431
Demo Agenda	432
Demo: Configuring an Allowlist to Restrict Access	433
Demo: Observability Features	434
Demo: OCI Service Metrics & OCI Logging	435
Demo: OIC Dashboards in OCI Logging Analytics	436
Demo: Fusion Application Monitoring	437
Demo: Administering the OIC Embedded File Server	438
Demo: Capturing OIC Activity Streams to OCI Logging	439
Module 10: Integration Solution Examples	441
Demo: Business Event Subscription	442
Business Event Subscription: Oracle ERP Cloud to Shopify	446
Demo: ChatGPT to Slack Prebuilt Solution	447
Demo: Using the Google Cloud Pub/Sub Adapter	448
Demo: Using the OCI AI Document Understanding Service	449
Demo: Using OCI Streaming for Pub/Sub	450
Demo: Shopify – ERP Cloud Accelerator	451
Demo: Contract to Procurement – Salesforce, Coupa, DocuSign	452
Demo: Sync Primavera with PostgreSQL via AWS SQS	453
Demo: Cohere to Slack Prebuilt Solution	454
Demo: Oracle ERP Cloud Warehouse Management Inventory Transactions Prebuilt Solution	455
