

Enhancing Sustainability in PPP Projects

Hours: 80 Hours

Course Overview: This course delves into the core principles and practices of Sustainable Public Procurement (SPP), focusing on integrating sustainability into procurement strategies, operations, and decision-making processes. Participants will explore innovative approaches to achieving environmental, social, and economic objectives through public procurement.

Target Audience:

This course is designed for professionals and stakeholders involved in procurement and sustainability efforts, including:

- **Procurement Practitioners:** Professionals in public and private procurement looking to integrate sustainability into their operations.
- **Government Officials:** Policymakers and public sector representatives responsible for developing and implementing procurement strategies.
- **Sustainability Specialists:** Professionals focused on driving sustainability initiatives within organizations.
- **Business Leaders:** Executives and managers aiming to align procurement practices with corporate sustainability goals.
- **NGOs and Advocacy Groups:** Representatives seeking insights into sustainable procurement to influence and promote best practices.
- **Academics and Researchers:** Individuals interested in exploring the intersection of procurement, sustainability, and innovation.

Part I: Sustainable Public Procurement (SPP)

Module 1: Foundations of Sustainable Public Procurement

- Introduction to SPP and its objectives.
- Global trends and drivers for sustainable procurement.
- Benefits and challenges of adopting SPP in public and private sectors.

Module 2: Sustainable Procurement Strategy and Planning

- Steps to align procurement strategies with sustainability goals.
- Defining key performance indicators for SPP.

- Tools and techniques for effective planning.

Module 3: Environmental and Social Sustainability in Procurement

- Incorporating green procurement practices.
- Leveraging environmentally preferred goods and services.
- Addressing social inclusion and equity through procurement.

Module 4: Innovative Approaches and Tools for SPP

- Utilizing technology and digital tools in sustainable procurement.
- Examples of innovative practices from global procurement leaders.
- Monitoring and reporting sustainability outcomes.

Module 5: Creating and Implementing SPP Frameworks

- Steps to develop an SPP framework tailored to organizational needs.
- Ensuring buy-in and stakeholder engagement.
- Integration with existing procurement policies.

Module 6: Case Studies and Success Stories in SPP

- Real-world examples of sustainable procurement practices.
- Lessons learned from successful implementations.
- Challenges and solutions in different contexts.

Module 7: Building Capacity for SPP

- Training and capacity-building for procurement teams.
- Encouraging a sustainability mindset across departments.
- Fostering collaboration with suppliers and stakeholders.

Part II: Public-Private Partnerships (PPP)

Module 8: Introduction to Public-Private Partnerships (PPP)

- Definition, importance, and scope of PPPs.
- Key differences between PPPs and traditional procurement.
- Benefits of PPPs in delivering public services and infrastructure.

Module 9: Frameworks and Best Practices for PPPs

- Essential components of successful PPP projects.
- Structuring and managing PPP agreements.
- Evaluating risks and benefits in PPP collaborations.

Module 10: PPP for Sustainability and Development Goals

- Leveraging PPPs for achieving environmental and social objectives.
- Examples of PPP projects driving sustainability.
- Balancing stakeholder interests and aligning with procurement goals.
