

# Implementing and Administering SAP Build Work Zone

---

## Course Description

This course provides a comprehensive guide to implementing and administering SAP Build Work Zone. Participants will explore deployment strategies, system configuration, integration, and extensibility options to create engaging, personalized digital experiences. By the end of this course, learners will understand the solution architecture, essential components, security protocols, and implementation methodologies to successfully manage and extend SAP Build Work Zone in a productive environment.

---

## Audience Profile

This course is designed for:

- **Administrators** responsible for managing and maintaining SAP Build Work Zone.
  - **Implementation Specialists** involved in configuring and deploying SAP Build Work Zone solutions.
  - **IT Professionals** with a focus on system integration, extensibility, and administration.
- 

## Prerequisites

Participants should have:

- Basic knowledge of SAP Cloud technologies.
  - Familiarity with the SAP Business Technology Platform (Cloud Foundry stack).
  - Understanding of SAP Build and no-code application composition.
- 

## Course Objectives

After completing this course, learners will be able to:

- Understand the goals and structure of SAP Build Work Zone.
- Explain the solution architecture, default components, and extensibility options.
- Configure SAP Build Work Zone for business and functional requirements.

- Administer security, user provisioning, and identity management.
  - Integrate applications and manage digital workspaces effectively.
  - Implement SAP Build Work Zone using best practices and SAP Activate methodology.
- 

## **Table of Contents**

### **Unit 1: Introducing SAP Build Work Zone**

- Explaining the SAP Build Portfolio
- Articulating Personalized and Engaging Digital Experiences
- Getting Started with SAP Build Work Zone

### **Unit 2: Presenting the Solution Architecture and Components**

- Explaining the Architecture of SAP Build Work Zone
- Exploring Mandatory and Default Components
- Exploring Optional Components
- Explaining the Planning Landscape for SAP Build Work Zone

### **Unit 3: Exploring the Information Architecture**

- Explaining Features and Capabilities of SAP Build Work Zone
- Mastering the Site Menu
- Managing Workpages
- Working with Workspaces
- Integrating Applications
- Navigating User Settings and Features in the SAP Build Work Zone Header Bar

### **Unit 4: Describing Extensibility in SAP Build Work Zone**

- Illustrating Extensibility in SAP Build Work Zone
- Exploring UI Integration Cards
- Exploring Launchpad Plugins
- Exploring Content Packages

### **Unit 5: Presenting the Integration Capabilities of SAP Build Work Zone**

- Presenting Integration Scenarios and Patterns
- Exploring Business Application Integrations

- Integrating with Central Services
- Explaining APIs and Webhooks
- Exploring Integrations with Microsoft
- Exploring Integrations with SAP SuccessFactors
- Explaining the Integration with SAP Integrated Business Planning (IBP)
- Explaining Complex Integration Models

#### **Unit 6: Describing Security in SAP Build Work Zone**

- Positioning Security as Part of the SAP Build Work Zone Solution Architecture
- Illustrating the Big Picture of SAP Build Work Zone Security Architecture
- Explaining the Authentication Flow of SAP Build Work Zone
- Explaining the Provisioning of Users and Roles in SAP Build Work Zone

#### **Unit 7: Explaining the Implementation Methodology**

- Identifying the Steps of the Implementation Methodology
- Explaining the Prepare Phase
- Explaining the Explore Phase
- Explaining the Realize Phase
- Explaining the Deploy Phase
- Explaining the Run Phase
