
Angular 18 - Table of Contents (TOC)

1. Introduction to Angular

1. What is Angular?
2. Features of Angular 18
3. Angular vs. React vs. Vue
4. Setting up Angular Development Environment
5. Creating an Angular Project (ng new)
6. Understanding Angular CLI Commands

2. Angular File Structure & Project Setup

1. Overview of Angular Project Structure
2. Understanding src/app folder
3. Importance of angular.json, package.json, and tsconfig.json
4. Running & Serving the Angular App (ng serve)

3. TypeScript for Angular

1. Introduction to TypeScript
2. TypeScript Data Types
3. Functions and Arrow Functions
4. Interfaces and Classes
5. Modules and Decorators

4. Components in Angular

1. Understanding Components
2. Creating Components using CLI
3. Component Lifecycle Hooks
4. Passing Data using @Input() and @Output()
5. ViewChild & ContentChild

5. Templates & Directives

1. Angular Template Syntax

2. Structural Directives (*ngIf, *ngFor, *ngSwitch)
3. Attribute Directives ([ngClass], [ngStyle])
4. Custom Directives

6. Angular Data Binding

1. Interpolation ({{ }})
2. Property Binding ([])
3. Event Binding (())
4. Two-Way Binding ([[(ngModel)]])

7. Angular Services & Dependency Injection

1. Creating Angular Services (ng generate service)
2. Dependency Injection (DI)
3. Singleton Services
4. Sharing Data using Services

8. Angular Forms

1. Template-Driven Forms
 - Binding Form Fields
 - Form Validation (Built-in Validators, Custom Validators)
2. Reactive Forms
 - Creating Reactive Forms
 - Validating Reactive Forms
 - Submitting Form Data

9. Angular Routing & Navigation

1. Setting up Routing in Angular
2. Configuring Routes (RouterModule)
3. Router Links (routerLink)
4. Route Parameters (ActivatedRoute)
5. Lazy Loading Modules
6. Route Guards (CanActivate, CanDeactivate)

10. Angular Pipes

1. Built-in Pipes (DatePipe, UpperCasePipe, CurrencyPipe, etc.)
2. Custom Pipes
3. Using Pipes with Parameters

11. HTTP Client & API Integration

1. Setting up HttpClientModule
2. Making GET, POST, PUT, DELETE Requests
3. Handling API Errors using HttpInterceptor
4. Observables vs. Promises
5. Handling Authentication Tokens

12. State Management in Angular

1. Introduction to State Management
2. Using RxJS and Observables
3. Angular Signals
4. NgRx for Advanced State Management

13. Angular Modules & Lazy Loading

1. Understanding Angular Modules
2. Feature Modules vs. Core Modules
3. Lazy Loading Modules
4. Preloading Strategies

14. Progressive Web Apps (PWA) with Angular

1. Introduction to PWAs
2. Enabling PWA Support in Angular (ng add @angular/pwa)
3. Understanding use cases of Service Workers and Caching

15. Testing in Angular

1. Unit Testing with Jasmine & Karma
2. Component Testing
3. Service Testing

16. Security in Angular

1. Best Practices for Security
2. Handling JWT Authentication
3. Protecting Routes with Guards

17. Deploying Angular Applications

1. Building Angular App for Production (ng build --prod)
-
