

DO040

Red Hat Agile Integration Technical Overview

Duration: 1 Day

Course description

Learn the basics of agile integration

Red Hat Agile Integration Technical Overview (DO040) provides a technical introduction to Red Hat's comprehensive set of integration and messaging technologies.

Outline for this course

Video 1. Introduction to Red Hat Agile Integration and Red Hat OpenShift®

Video 2. Discussion and demonstration of Red Hat AMQ, a flexible messaging platform that delivers information reliably, enabling real-time integration

Video 3. Discussion and demonstration of Red Hat Fuse, a distributed, cloud-native integration platform

Video 4. Discussion and demonstration of Red Hat 3Scale, which makes cloud-native development simpler and more flexible

Video 5. Combining the previous demonstrations using Red Hat's integration portfolio
