Power Automate Flows Masterclass

(4 Hours)

Overview

This comprehensive course is designed for individuals who want to explore the capabilities of Power Automate, focusing on desktop flows, process advisor, and cloud flows. Participants will gain hands-on experience creating and managing desktop flows, leveraging the task mining capability of process advisor, and implementing advanced workflows using cloud flows. By the end of this course, attendees will have a solid understanding of how to automate repetitive tasks, streamline processes, and enhance productivity using Power Automate.

Audience Pre-requisites

Basic understanding of Power Automate concepts and familiarity with the Microsoft Power Platform

Experience with creating basic cloud flows

Basic knowledge of workflow processes and RPA (Robotic Process Automation) will be beneficial.

Course Syllabus

Module 1: Desktop Flows

- Introduction to RPA and Desktop Flows

- Create your first Power Automate desktop flow

- Use Input and output parameters

- Use Desktop Flows in Cloud Flows

Module 2: Process Advisor

- Process and Task mining

- Get started with the task mining capability

Module 3: Cloud Flows

- Conditionals and loops in Cloud Flows

- Processing Approvals with Cloud flows
