

Security For Business Leaders

SUMMARY:

This webinar is designed to equip business leaders with the knowledge and tools to enhance data security, compliance, and access management within their organizations using Microsoft 365. The session will focus on key topics such as sensitivity labels, data loss prevention (DLP), and secure user access management. Attendees will gain actionable insights into how to protect sensitive information, mitigate risks, and ensure compliance while maintaining operational efficiency.

KEY POINTS:

- **Leverage Sensitivity Labels for Data Protection and Compliance -** Understand how sensitivity labels can classify and protect sensitive data across emails, documents, and collaboration platforms like SharePoint and Teams.
- **Implement Microsoft Purview Data Loss Prevention (DLP) to Mitigate Risks -** Discover how DLP policies can prevent accidental or intentional sharing of sensitive data across Microsoft 365 applications.
- **Manage Permissions and Secure User Access in Microsoft 365-** Explore best practices for managing roles, role groups, and permissions to ensure the right people have access to the right resources.
