Security For IT Admins/Developers

SUMMARY:

The session is structured to help participants understand the fundamentals of Security Copilot, its core features, and how to effectively utilize its capabilities. Key topics include terminology, prompt processing, enabling the solution, and exploring its standalone and plugin-based features. The webinar also delves into custom promptbooks and knowledge base integrations, offering a holistic view of how Security Copilot can streamline security workflows.

KEY POINTS:

- **Introduction to Microsoft Security Copilot -** Understand the core functionalities and potential of Microsoft Security Copilot in transforming cybersecurity operations through AI-driven threat detection, response automation, and decision-making.

- **Core Features and Standalone Experience -** Explore how Security Copilot enhances security workflows with real-time threat analysis, incident response automation, and dynamic session interactions in its standalone experience.

- **Plugin Ecosystem and Customization -** Discover the integration of Microsoft and non-Microsoft plugins, custom promptbooks, and knowledge base connections to tailor Security Copilot to your organization's unique security needs.

TARGET AUDIENCE

- Developers
- IT/Security Admins
- SOC Team
