

# VMware Carbon Black App Control Administrator

## Course Overview

This one-day course teaches you how to use the VMware Carbon Black® App Control™ product and leverage the capabilities to configure and maintain the system according to their organization's security posture and organizational policies. This course provides an in-depth, technical understanding of the Carbon Black App Control product through comprehensive coursework and hands-on scenario-based labs.

## Course Objectives

By the end of the course, you should be able to meet the following objectives:

- Describe the components and capabilities of application control
- Manage and configure the Carbon Black App Control server based on organizational requirements
- Create policies to control enforcement levels and agent functionality
- Implement rules to support the organization's security posture
- Use the Carbon Black App Control tools to understand agent and server data

## Target Audience

System administrators, security operations personnel including analyst and managers.

## Prerequisites

There are no prerequisites for this course.

## Course Delivery Options

- Classroom
- Live Online
- [Onsite](#)
- [On Demand](#)

## Product Alignment

- VMware Carbon Black App Control

## Course Modules

- 1 **Course Introduction**
  - Introductions and course logistics
  - Course objectives
- 2 **Login Accounts and Groups**
  - User accounts
  - User roles
- 3 **Policies**
  - Modes and Enforcement Levels
  - Rule sets
  - Software Approvals
  - Notifiers
- 4 **Computer Details**
  - View agent information
  - Related views
  - Local Approval
- 5 **Custom Rules**
  - Rule type and use cases
  - Software Approvals
- 6 **Tools**
  - Meters and Alerts
- 7 **Events**
  - Agent and server events
- 8 **Baseline Drift**
  - Changes in a baseline
