

DP-602T00: Implement a Data Warehouse with Microsoft Fabric

Duration: 8 Hours (1 Day)

Overview

As of my knowledge cutoff in early 2023, there's no official certification called "DP-602 - Implement a Data Warehouse with Microsoft Fabric" provided by Microsoft. It's possible that you might be referring to a different or upcoming certification, or a certification from a third-party provider that isn't widely recognized. Microsoft certifications related to Data Warehousing typically revolve around Azure, Microsoft's cloud platform, with exams like the DP-203, which deal with Data Engineering on Azure and cover concepts of implementing and managing Data Storage Solutions, such as Data Lakes and Databases. These certifications are designed to validate the skills necessary for industry professionals to effectively build, maintain, and optimize data warehouses in Azure, ensuring efficient Data Management and accessibility for Analytical Solutions.

Audience Profile

- IT professionals seeking expertise in Microsoft Fabric for data warehousing
- Database administrators aiming to implement a scalable Data Warehouse
- Business intelligence specialists focused on Microsoft technologies
- Data architects interested in learning data warehouse implementation with Microsoft Fabric
- Technical team leads overseeing data warehouse projects

Course Syllabus

Table of Contents:

- Get started with data warehouses in Microsoft Fabric
- Load data into a Microsoft Fabric data warehouse
- Query a data warehouse in Microsoft Fabric
- Monitor a Microsoft Fabric data warehouse
