1 Plan To Use Policies

Course Purpose	1-2
Course Topics	1-3
Course Objectives	1-4
Course Logistics	1-5
Oracle University Reporting	1-6
Introduction to Plan Policies	1-7
Lesson Objectives	1-8
What Is Policy Management?	1-9
What Is the Role of Policies in Supporting Policy Management?	1-10
Three Areas Where Policy Has Proven to Be Strongest	1-11
Policy Management Functions	1-12
Policy Management Supports Many Access Methods	1-13
Policy Targets	1-14
Policy Decision Making	1-15
Examples of Applications	1-16
Service Examples: Peak/Off-Peak Plans	1-17
Service Examples: Tiered plans	1-18
Service Examples: Quota Plans	1-19
Service Examples: Personalized Services	1-20
Service Examples: Advanced Services	1-21
PCC Components According to 3GPP	1-22
Summary	1-23
Quiz	1-24
Practice	1-28

2 Plan Business Needs, Use Cases, and Policies

Objectives	2-2
Policy Design Process	2-3
Business Needs	2-4
Use Case	2-6
Structure of a Policy	2-7
Policies Make a Use Case	2-8
Apply Use Cases to Network Conditions	2-9
Apply Use Cases to Business Opportunities	2-10

Summary 2-11

Quiz 2-12

Practice 2-16

3 Implement Conditions

Objectives 3-2

Introduction to Configure 3-3

Basic Components of a Policy 3-4

Condition Information Sources 3-5

Conditions Groups 3-6

Examples of Conditions Groups - Request and Application 3-7

Examples of Conditions Groups - Network Device Identity and Network Device
Usage 3-8

Examples of Conditions Groups - Mobility and User 3-9

Examples of Conditions Groups - User State and Time of Day 3-10

Creating a New Policy 3-11

Creating a New Policy – Start Step 3-12

Creating a New Policy – Conditions 3-13

Summary 3-14

Quiz 3-15

Practice 3 3-19

4 Implement Actions

Objectives 4-2

Actions 4-3

Examples of Mandatory Actions 4-4

Optional Actions and Parameters 4-7

Accessibility: Graphic Descriptions 4-8

Variables - Example 4-9

Summary 4-10

Quiz 4-11

Practice 4 4-14

5 Implement Reference Data

Objectives 5-2

Quota Profiles 5-3

Profile Plans 5-4

Varieties of Quota Profile Plans 5-5

Examples of Varieties of Plans 5-6

How Quota Profile Plans Are Used 5-7

Quota Plans for Subscribers and Pools 5-9

- Pool Quota Profile Subscriber Record 5-10
- Pool Quota 5-11
- Quota Conventions 5-12
- Referencing Quota Conventions 5-13
- Rollovers 5-14
- Top-ups 5-16
- Supporting Quota Use Cases – Types of Use Cases 5-17
- Policies for Quota Use Cases 5-18
- Summary 5-20
- Quiz 5-21
- Practice 5-25

6 Implement Structured Policies

- Objectives 6-2
- Tools for Structuring Policies 6-3
- Boolean Operations for Conditions 6-4
- Traditional Boolean and Postfix Notation 6-5
- Boolean Operators in Policies 6-6
- Nested Policies 6-7
- Introduction to Nested Policies 6-8
- Efficiency Through Child Policies 6-9
- An Example Using Nested Policies 6-10
- Summary 6-11
- Quiz 6-12
- Practice 6-15

7 Implement Policy Tables

- Objectives 7-2
- When Can Policy Tables Help? 7-3
- What Are Policy Tables? 7-4
- Elements of a Policy Table – Rows and Columns 7-5
- Example of a Use Case Without Policy Tables 7-6
- Example of a Policy Table 7-7
- Example of a Policy That Uses a Policy Table 7-8
- Create a Policy Table 7-9
- Name the Table 7-10
- Add a Key Field 7-11
- Review the Key Column 7-12
- Create One or More Indexed Columns 7-13
- Add Rows and Populate Fields 7-14
- Use a Policy Table 7-15

- Start the Policy Wizard 7-16
- Select the Table and Name an Alias 7-17
- Reference a Key Field 7-18
- Use the Indexed Fields 7-19
- The Final Policy 7-20
- Summary 7-21
- Quiz 7-22
- Practice 7-26

8 Determine Test Data

- Objectives 8-2
- Introduction to Test 8-3
- Policy Management Data to Verify 8-4
- Network Elements – Far End Peer Configuration 8-5
- Network Elements – Near End Peer Configuration 8-6
- MRA and MPE Configuration 8-7
- Reference Data 8-8
- Subscriber Record Data 8-9
- Interactions with Other Policies – Policy Order 8-10
- Interactions with Other Policies – Parameter Values 8-11
- Pre-check Logs 8-12
- Test Messages 8-13
- MRA/MPE IP Addresses 8-14
- Diameter Identities in the Tester 8-15
- Network Element Settings 8-16
- Connection Message 8-17
- Essential AVPs 8-18
- Test Policy AVPs 8-19
- Summary 8-20
- Quiz 8-21
- Practice 8-25

9 Verify Performance

- Objectives 9-2
- Designing the Test 9-3
- Choose the Test Target Policy 9-4
- Choose Components 9-5
- Choose Points to Analyse 9-6
- Check Dependencies 9-8
- Check Network Element Configuration 9-9
- Check MRA Match to Tester 9-10

Check MPE	9-11
Identify Environment Requirements	9-12
Required Reference Data is Available	9-13
Configuration of Reference Data is Correct – Quota	9-14
Configuration of Reference Data is Correct – Traffic Profile	9-15
Analyze Diameter Connection	9-16
Reset Counters	9-17
Send CER	9-18
Verify CER Was Received at MRA	9-19
Verify Session Was Recorded	9-20
Analyze Performance	9-21
Send and Check CCR	9-22
Check MRA Binding	9-23
Check CCR to MPE	9-24
Check UDR Message from MPE to UDR	9-25
Check UDA Message from UDR to MPE	9-26
Check UDR Data in MPE Session Buffer	9-27
Check That the Policy Was Evaluated	9-28
Check That the Policy Evaluated as True	9-29
Analyze Traffic Profiles - Expected	9-30
Analyze Traffic Profiles	9-31
Summary	9-32
Quiz	9-33
Practice	9-38

10 Post View

Objectives	10-2
Focus Policy Development	10-3
Purpose of Analysis	10-4
Evaluate Business Need	10-5
Verify Use Cases Support the Business Need	10-6
Verify That Policies Support the Use Case	10-7
Analyze Policy Environment	10-8
Purpose of Analysis	10-9
Identify Message Requirements	10-10
Identify and Verify Reference Data Requirements	10-11
Identify and Verify Subscriber Record Requirements	10-12
Identify and Verify Event and Internal Information Requirements	10-13
Run the Test	10-14
The Goal of the Test	10-15
Create and Verify Connection	10-16

Trace the Processing of the Message 10-17

MRA Server 10-18

UDR System 10-19

MPE Server 10-20

Policy Results and Statistics 10-21

Summary 10-22

Quiz 10-23

Practice 10-27

Course Summary 10-28

End of Course 10-29

Final Questions? 10-30

End of Course Evaluation 10-31
