

SAP Business Technology Platform Foundation

Duration :2 days (16 Hours) Start Time : 9:00 am to 5:00 pm

Course Overview

The Customised SAP Business Technology Platform Foundation course is designed to provide learners with a comprehensive understanding of the SAP Business Technology Platform ([SAP BTP](#)). The course offers insights into SAP's strategic vision, the architecture and services of [SAP BTP](#), and practical knowledge on how to leverage the platform for developing applications, automation, integration, and handling data and analytics. It also covers the implementation of artificial intelligence (AI) solutions, ensures learners grasp the security fundamentals crucial for enterprise applications, and addresses the role of [SAP Cloud](#) in fostering sustainable enterprises. By participating in this course, learners will acquire the skills necessary to effectively use [SAP BTP100](#) to drive innovation and [digital transformation](#) within their organizations, thereby enhancing business processes and outcomes. With a focus on the latest technologies and industry best practices, this course is valuable for IT professionals, SAP consultants, and anyone looking to deepen their knowledge of SAP's integrated technology platform
