

MS-4019

Transform your everyday business processes with no-code agents

Course description

This course is designed to train everyday business users on how to create, manage, and use no-code agents in Microsoft 365 Copilot Chat and SharePoint.

This one-day course is composed of a single Learning Path, which has the same name as the course. This Learning Path consists of three modules. The first module introduces no-code agents. The second module examines how to create and manage them in SharePoint. The final module explores how to share and use no-code agents.

Audience prerequisites

- Basic functional experience with Microsoft 365 services.
- A proficient understanding of general IT practices.

Table of Contents

Learning Path	Module
Course Introduction	Introduction

Learning Path 1: Transform your everyday business processes with no-code agents	Module 1: Get started with no-code agents Module 2: Build and manage a no-code agent Module 3: Use no-code agents
--	--

Module 2 exercises

Module 2 includes two classroom exercises. The purpose of the exercises is to have students practice writing instructions and starter prompts for no-code agents.

Real-world use cases

Students should explore the existing Microsoft 365 app ecosystem to see the variety of apps and use-cases available already.
