

JMeter Performance Testing in 16 Hrs

Duration: 16 hrs

Prerequisites: Knowledge of Performance Testing

Module 1. Performance Testing Basic

- What Is Performance Testing
- Types of Performance Testing
- Common Performance Problem
- How to conduct performance testing?
- Performance Testing Metrics: Parameters Monitored
- Examples Of Performance Test-Cases
- Performance Test Tools

Module 2. Performance Testing Using Jmeter

- JMeter To the Rescue
- Advantages Of JMeter
- How does JMeter work?
- JMeter Installation
- What are the Elements in JMeter
- What is a Test Plan?
- Thread Group
- Sampler
- Listeners
- Logic Controller
- Config Element
- Assertion
- Pre-processor
- Post Processor
- Timers
- JDBC Request Samplers
- FTP Request Samplers
