

NCP-MCI Exam Prep Class

Duration: 1 day

Description

This course helps prepare you for the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) exam. We will refresh the knowledge covered by the Enterprise Cloud Administration (ECA) course by going through all course topics in condensed format, and by running you through a set of practice questions for each module.

What You Will Learn

- This course helps prepare you for the Nutanix Certified Professional - Multicloud Infrastructure (NCP-MCI) v6.5 exam.

Course Outline

- Section 1 - Manage Cluster, Nodes, and Features
- Section 2 - Manage Cluster Storage
- Section 3 - Configure Cluster Networking and Network Security
- Section 4 - Analyze and Remediate Performance Issues
- Section 5 - Configure, Analyze, and Remediate Alerts and Events
- Section 6 - Manage VM Deployment and Configuration

Audience

- Anyone who is pursuing the NCP-MCI certification

Pre-requisite

- Students should have completed the Enterprise Cloud Administration (ECA) course
