

Synopsis of Certified Data Management Professional Course (CDMP)

Course Duration: 24 Hours (3 days)

Overview

This 3-day intensive training program provides a theory-based overview of the core data management disciplines aligned with the DAMA-DMBOK2 framework. The course covers essential knowledge areas including Data Governance, Data Architecture, Data Modelling and Design, Data Security, Metadata Management, Data Quality, Data Warehousing & Business Intelligence, Document and Content Management, and Master and Reference Data Management.

Designed for professionals seeking a strong foundation in enterprise data management, the program is enriched with real-world examples and industry-relevant case studies to bridge the gap between conceptual knowledge and practical application. It also serves as a comprehensive preparation for the CDMP Fundamentals certification exam.

Course Prerequisites

There are no formal prerequisites for this course; however, a basic understanding of data management concepts is beneficial.
