DP-3029: Work smarter with Copilot in Microsoft Fabric

Course Overview

This course empowers learners to harness the full potential of Copilot in Microsoft Fabric to streamline data workflows and generate insights faster. Participants will explore how to:

- Integrate, transform, and store data using Fabric
- Use Copilot to create insightful reports and visualizations
- Boost productivity with AI-powered assistance

Whether you're building data pipelines or crafting dashboards, Copilot in Fabric helps you work smarter—not harder.

Duration : 1 day(8 hours)

Audience Profile

This course is designed for:

- Data Analysts and Data Engineers
- Professionals with a basic understanding of Microsoft Fabric and Power BI
- Learners familiar with core data concepts and terminology

Content Coverage :

Module 01 : Introduction

- Learn to Use Copilot in Microsoft Fabric

Module 02 : Experiences for Copilot in Microsoft Fabric

- Copilot for Data Factory
- Copilot for Data Engineering and Data Science
- Copilot for Data Warehouse
- Copilot for Real-Time Intelligence
- Copilot for Power BI

Module 03 : Hands-On Learning

- Creating Intelligent data transformation using Copilot for Data Factory
- Accelerating data engineering tasks using Copilot for Data Engineering
- Creating analytical models using Copilot for Data Science
