

Data Privacy and EU General Data Protection Regulation (GDPR) Practitioner

- Develop an understanding of the underpinning principles, terminology, and concepts of the GDPR.
- Understand GDPR Data Categories & Subject Rights
- Understanding Data Privacy Impact Assessment
- Gain an understanding of GDPR – Breach Reporting and Penalty

What will you learn?

GDPR is all about protecting customer and employee data. It requires organizations to adopt stricter data protection policies, to document how they store, use, and share personal data and review data governance principles regularly to ensure compliance. The focus of the GDPR is to strengthen and unify data protection for individuals within the EU as well as address the export of personal data outside the European Union (EU), which means it protects the misuse of personal identifiable information (PII) of any kind of EU citizens.
