

ServiceNow Security Operations (SecOps) Fundamentals

Course Description:

Security Operations Fundamentals On Demand is a self-paced course providing a high-level view of ServiceNow's Security Operations products. The course introduces key concepts and functionalities in Security Operations, covering areas such as Vulnerability Response, Security Incident Management, and Threat Intelligence.

Audience Profile:

This course is designed for professionals seeking foundational knowledge of ServiceNow Security Operations. Ideal participants include IT security analysts, system administrators, security operations personnel, and anyone involved in security response processes.

Prerequisite:

Basic familiarity with IT security concepts and general ServiceNow navigation is recommended but not required.

Course Objective:

Upon completion of this course, participants will be able to:

- Understand the core components and functionalities of Security Operations in ServiceNow.
- Identify the features and use cases of Vulnerability Response, Security Incident Management, and Threat Intelligence.
- Navigate Security Operations modules and use common functionality to support security processes.
