COURSE OVERVIEW

The “Installation and Configuration in Microsoft Dynamics 365 Business Central (On-premises)” course provides a comprehensive understanding of setting up and customizing Microsoft Dynamics 365 Business Central for on-premises deployments. It’s designed for IT professionals, system administrators, and technical consultants who are responsible for installing, configuring, and maintaining Dynamics 365 Business Central systems. From Architecture and Client options to Server requirements, the course breaks down each component necessary for a successful implementation. Learners will gain insights into server and client components, Microsoft Dynamics NAV Server configurations, handling different clients, and Integrating with Office 365 and CRM. The development environment module focuses on the tools for development, Managing databases, and Licenses. Client personalization allows learners to understand how to tailor the user interface to meet business needs. Deployment strategies are discussed, including the use of ClickOnce and Microsoft Azure. Finally, the course delves into the use of Microsoft Dynamics PowerShell for administration and development tasks. This course empowers students with the skills to ensure a smooth and efficient Business Central deployment, ultimately enabling businesses to leverage the full power of the platform.

WHO THIS COURSE IS FOR

This course provides in-depth training on setting up and managing Microsoft Dynamics 365 Business Central (On-premises), tailored for IT professionals.

System Administrators

IT Professionals

Technical Consultants

Database Administrators
