HANDS-ON ACTIVITIES

8 hours including breaks

COURSE OVERVIEW

This course covers the fundamentals of disaster management, including the types and phases of disasters, and examines common disasters such as earthquakes, floods, fires, cyclones, pandemics and chemical spills through past case studies. It addresses risk assessment and preparedness planning, covering vulnerability, capacity and the creation of disaster risk profiles and preparedness plans, before moving to emergency kits and evacuation planning. It also looks at the roles and responsibilities of government, NGOs, community and individuals, including Incident Command System basics, followed by a tabletop drill activity and communication practices during emergencies.

WHO THIS COURSE IS FOR

Target Audience:

General employees, community workers, or any individuals looking to understand disaster preparedness and response

LEARNING OBJECTIVES

- Explain what constitutes a disaster and its main types
- Describe the phases of disaster management
- Analyse the impact of common disasters using case studies
- Assess vulnerability and capacity to build a risk profile
- Plan community and workplace preparedness measures
- Prepare an emergency kit and an evacuation plan
- Identify the roles of government, NGOs and individuals in response
- Apply Incident Command System basics during a tabletop drill
