AI Governance: Risk Mgmt, Compliance & Strategy

Learn to design AI governance frameworks, manage risk and compliance, and build organisational AI strategy and adoption roadmaps.

5 Days
DURATION

27
MODULES

COURSE OVERVIEW

This course covers the foundations of AI governance and responsible AI, including the enterprise case for governance and principles of responsible AI use. It then examines governance frameworks, operating models, roles and responsibilities, and governance across the AI lifecycle, along with the tools that support them. Risk management topics follow, covering the AI risk landscape, model risk management, third-party and vendor governance, controls, assurance, and incident response. The course closes with regulatory compliance, policy development, and ethics, followed by building an AI strategy, prioritising use cases, defining operating models, planning implementation roadmaps, managing change and culture, and measuring success through KPIs.
