

KOENIG SOLUTIONS • COURSE OUTLINE

Identity with Windows Server 2016

Learn to deploy, configure and secure AD DS, AD CS, AD FS, AD RMS and Azure AD synchronization on Windows Server 2016.

13

MODULES

92

TOPICS

42

HANDS-ON ACTIVITIES

COURSE OVERVIEW

This course covers installing and configuring domain controllers, managing AD DS objects, and building advanced multi-domain and multi-forest infrastructures with sites and replication. It then addresses Group Policy implementation, user settings management, and securing Active Directory Domain Services. Later modules cover deploying and managing AD CS certificates, AD FS, and AD RMS, before concluding with directory synchronization to Microsoft Azure AD and monitoring, managing and recovering AD DS.

WHO THIS COURSE IS FOR

Systems Administrators

Identity Administrators

Infrastructure Engineers

Network Administrators

Security Administrators

LEARNING OBJECTIVES

- Describe AD DS components and domain controller deployment considerations
- Manage user, group, computer and OU objects in AD DS
- Deploy distributed AD DS environments and configure trusts
- Configure AD DS sites and monitor replication
- Implement and troubleshoot Group Policy objects and scope
- Configure Folder Redirection, scripts and Group Policy preferences
- Secure domain controllers, accounts and managed service accounts
- Deploy and administer certification authorities and certificates

13 Modules, 92 Topics

01

3 Activities

Installing and Configuring Domain Controllers

This module describes the features of AD DS and how to install domain controllers (DCs). It also covers the considerations for deploying DCs.

LESSONS

- Overview of AD DS
- Overview of AD DS domain controllers
- Deploying a domain controller

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Describe AD DS and its main components
- Describe the purpose and roles of domain controllers
- Describe the considerations for deploying domain controllers

02

3 Activities

2 Activities

Managing Objects in AD DS

This module describes how to use various techniques to manage objects in AD DS. This includes creating and configuring user, group, and computer objects.

LESSONS

- Managing user accounts
- Managing groups in AD DS
- Managing computer objects in AD DS
- Using Windows PowerShell for AD DS administration
- Implementing and managing OUs

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- | | |
|------------------------------------|---|
| ■ Manage user accounts in AD DS | ■ Use Windows PowerShell for AD DS administration |
| ■ Manage groups in AD DS | ■ Implement and manage OUs |
| ■ Manage computer objects in AD DS | ■ Administer AD DS |

Advanced AD DS Infrastructure Management

This module describes how to plan and implement an AD DS deployment that includes multiple domains and forests. The module provides an overview of the components in an advanced AD DS deployment, the process of implementing a distributed AD DS environment, and the procedure for configuring AD DS trusts.

LESSONS

- Overview of advanced AD DS deployments
- Deploying a distributed AD DS environment
- Configuring AD DS trusts

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Describe the components of an advanced AD DS deployment
- Deploy a distributed AD DS environment
- Configure AD DS trusts

Implementing and Administering AD DS Sites and Replication

This module describes how to plan and implement an AD DS deployment that includes multiple locations. The module explains how replication works in a Windows Server 2016 AD DS environment.

LESSONS

- Overview of AD DS replication
- Configuring AD DS sites
- Configuring and monitoring AD DS replication

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Describe how AD DS replication works
- Configure AD DS sites to help optimize authentication and replication traffic
- Configure and monitor AD DS replication

Implementing Group Policy

This module describes how to implement a GPO infrastructure. The module provides an overview of the components and technologies that compose the Group Policy framework.

LESSONS

- Introducing Group Policy
- Implementing and administering GPOs
- Group Policy scope and Group Policy processing
- Troubleshooting the application of GPOs

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Explain what Group Policy is
- Implement and administer GPOs
- Describe Group Policy scope and Group Policy processing
- Troubleshoot GPO application

Managing User Settings with Group Policy

This module describes how to configure Group Policy settings and Group Policy preferences. This includes implementing administrative templates, configuring folder redirection and scripts, and configuring Group Policy preferences.

LESSONS

- Implementing administrative templates
- Configuring Folder Redirection, software installation, and scripts
- Configuring Group Policy preferences

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Implement administrative templates
- Configure Folder Redirection, software installation, and scripts
- Configure Group Policy preferences

Securing Active Directory Domain Services

This module describes how to configure domain controller security, account security, password security, and Group Managed Service Accounts (gMSA).

LESSONS

Securing domain controllers · Implementing account security · Implementing audit authentication · Configuring managed service accounts

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

Secure domain controllers · Implement account security · Implement audit authentication · Configure managed service accounts (MSAs)

Deploying and Managing AD CS

This module describes how to implement an AD CS deployment. This includes deploying, administering, and troubleshooting CAs.

LESSONS

Deploying CAs · Administering CAs · Troubleshooting and maintaining CAs

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

Deploy CAs · Administer CAs · Troubleshoot and maintain CAs

Deploying and Managing Certificates

This module describes how to deploy and manage certificates in an AD DS environment. This involves deploying and managing certificate templates, managing certificate revocation and recovery, using certificates in a business environment, and implementing smart cards.

LESSONS

- Deploying and managing certificate templates
- Managing certificate deployment, revocation, and recovery
- Using certificates in a business environment
- Implementing and managing smart cards

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Deploy and manage certificate templates
- Manage certificates deployment, revocation, and recovery
- Use certificates in a business environment
- Implement and manage smart cards

Implementing and Administering AD FS

This module describes AD FS and how to configure AD FS in a single-organization scenario and in a partner-organization scenario.

LESSONS

- Overview of AD FS
- AD FS requirements and planning
- Deploying and configuring AD FS
- Overview of Web Application Proxy

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Describe AD FS
- Explain how to deploy AD FS
- Explain how to implement AD FS for a single organization
- Explain how to extend AD FS to external clients
- Implement single sign-on (SSO) to support online services

Implementing and Administering AD RMS

This module describes how to implement an AD RMS deployment. The module provides an overview of AD RMS, explains how to deploy and manage an AD RMS infrastructure, and explains how to configure AD RMS content protection.

LESSONS

- Overview of AD RMS
- Deploying and managing an AD RMS infrastructure
- Configuring AD RMS content protection

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Describe AD RMS
- Deploy and manage an AD RMS infrastructure
- Configure AD RMS content protection

Implementing AD DS Synchronization with Microsoft Azure AD

This module describes how to plan and configure directory syncing between Microsoft Azure Active Directory (Azure AD) and on-premises AD DS. The module describes various sync scenarios, such as Azure AD sync, AD FS and Azure AD, and Azure AD Connect.

LESSONS

- Planning and preparing for directory synchronization
- Implementing directory synchronization by using Azure AD Connect
- Managing identities with directory synchronization

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Plan and prepare for directory synchronization
- Implement directory synchronization by using Microsoft Azure Active Directory Connect (Azure AD Connect)
- Manage identities with directory synchronization

Monitoring, Managing, and Recovering AD DS

This module describes how to monitor, manage, and maintain AD DS to help achieve high availability of AD DS.

LESSONS

- Monitoring AD DS
- Managing the Active Directory database
- Active Directory backup and recovery options for AD DS and other identity and access solutions

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO

- Monitor AD DS
- Manage the Active Directory database
- Describe the backup and recovery options for AD DS and other identity access solutions

Practise What You Learn

#	MODULE	ACTIVITY
01	Installing and Configuring Domain Controllers	LAB: DEPLOYING AND ADMINISTERING AD DS ■ Deploying AD DS ■ Deploying domain controllers by performing domain controller cloning ■ Administering AD DS
02	Managing Objects in AD DS	LAB: MANAGING AD DS OBJECTS ■ Creating and managing groups in AD DS ■ Creating and configuring user accounts in AD DS ■ Managing computer objects in AD DS LAB: ADMINISTERING AD DS ■ Delegate administration for OUs ■ Creating and modifying AD DS objects with Windows PowerShell
03	Advanced AD DS Infrastructure Management	LAB: DOMAIN AND TRUST MANAGEMENT IN AD DS ■ Implementing forest trusts ■ Implementing child domains in AD DS
04	Implementing and Administering AD DS Sites and Replication	LAB: IMPLEMENTING AD DS SITES AND REPLICATION ■ Modifying the default site ■ Creating additional sites and subnets ■ Configuring AD DS replication ■ Monitoring and troubleshooting AD DS replication
05	Implementing Group Policy	LAB: IMPLEMENTING A GROUP POLICY INFRASTRUCTURE ■ Creating and configuring GPOs ■ Managing GPO scope LAB: TROUBLESHOOTING GROUP POLICY INFRASTRUCTURE ■ Verify GPO application ■ Troubleshooting GPOs
06	Managing User Settings with Group Policy	LAB: MANAGING USER SETTINGS WITH GPOS ■ Using administrative templates to manage user settings ■ Implement settings by using Group Policy preferences ■ Configuring Folder Redirection ■ Planning Group Policy (optional)
07	Securing Active Directory Domain Services	LAB: SECURING AD DS ■ Implementing security policies for accounts, passwords, and administrative groups ■ Deploying and configuring an RODC ■ Creating and associating a group MSA
08	Deploying and Managing AD CS	LAB: DEPLOYING AND CONFIGURING A TWO-TIER CA HIERARCHY ■ Deploying an offline root CA ■ Deploying an enterprise subordinate CA

#	MODULE	ACTIVITY
09	Deploying and Managing Certificates	LAB: DEPLOYING AND USING CERTIFICATES ■ Configuring certificate templates ■ Enrolling and using certificates ■ Configuring and implementing key recovery
10	Implementing and Administering AD FS	LAB: IMPLEMENTING AD FS ■ Configuring AD FS prerequisites ■ Installing and configuring AD FS ■ Configuring an internal application for AD ■ Configuring AD FS for federated business partners
11	Implementing and Administering AD RMS	LAB: IMPLEMENTING AN AD RMS INFRASTRUCTURE ■ Installing and configuring AD RMS ■ Configuring AD RMS templates ■ Using AD RMS on clients
12	Implementing AD DS Synchronization with Microsoft Azure AD	LAB: CONFIGURING DIRECTORY SYNCHRONIZATION ■ Preparing for directory synchronization ■ Configuring directory synchronization ■ Managing Active Directory users and groups
13	Monitoring, Managing, and Recovering AD DS	LAB: RECOVERING OBJECTS IN AD DS ■ Backing up and restoring AD DS ■ Recovering objects in AD DS

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.

FLEXIBLE DELIVERY
