HANDS-ON LABS

COURSE OVERVIEW

This course covers SharePoint Online and Office 365 fundamentals, including the app launcher, Delve and OneDrive, before moving into planning and creating sites, subsites and navigation with classic and modern interfaces. It then addresses building and publishing web pages, working with lists, libraries and marketplace apps, and automating business processes using Flow, PowerApps and classic workflows. Later modules cover customising security and permissions, working with search and Delve, and managing enterprise content through metadata, content types and records management.

WHO THIS COURSE IS FOR

Site Owners

Site Collection Administrators

SharePoint Power Users

Content Managers

Business Process Owners

LEARNING OBJECTIVES

- Explain the core features of Office 365 and SharePoint Online
- Plan and create sites, subsites and navigation structures
- Apply site templates and themes to build new sites
- Create and manage web pages using web parts and news posts
- Configure lists, libraries and apps including versioning and alerts
- Build business processes with Flow, PowerApps and classic workflows
- Customise security, permission levels and access requests
- Manage content types, metadata and records for enterprise content

8 Modules, 95 Topics

01

5 Labs

An Introduction to SharePoint Online

Let's get started with SharePoint online by letting you know about its fantastic selection of features. We will demonstrate popular uses of SharePoint Online to manage and share content, create engaging web page, automate business processes and make good business decisions with Business intelligence. We will also discuss who will be the typical users in our sites and the role of the site collection administrator. Site Owners are trusted with functionality that in other business systems would normally only be available to developers. As a new Site Owner, we're sure that you will be amazed with the potential that SharePoint Online has to offer an end user.

TOPICS

- Introducing Office 365 and SharePoint
- Getting started with Office 365
- The cloud revolution
- Login to Office 365
- What is Office 365
- Using the app launcher
- What is SharePoint
- Office 365 settings
- Introducing Office 365 Groups
- Delve
- Ownership and Access
- OneDrive

02

5 Labs

Creating Sites

Whether you are managing existing sites or you have not yet started, we will complement your current situation by discussing site hierarchy and planning your SharePoint sites. This will allow you to understand existing sites that other people have created as well as making good decisions when building new sites. As a site owner, you will be presented with a selection of site templates. You will use a variety of popular site templates to develop an enhanced understanding of each sites function and appropriate use. Once your site is ready, we will then change the look and feel of your site. You can even try applying your business brand to your test site. We will also build our navigation bar, a simple but powerful way to help users move between websites.

TOPICS

- Planning your sites
- Create new subsites
- The Office 365 tenant
- Site templates
- Web addresses
- Apply a theme
- Site collections
- Building your navigation
- Create a new site
- Delete subsites
- Team site navigation
- **User interface:** classic vs modern
- **Site contents:** classic vs modern
- Where does classic come from?

Creating and Managing Web Pages

SharePoint boasts a rich selection of ways to build web pages. You will learn how to update the home page of your SharePoint site with text, links, images, videos and web parts. We will also show you best practices when creating multiple pages and linking them together. In most site templates, creating and managing web pages is a simple, fast and rewarding way to present essential information and apps. SharePoint can also be used as an Intranet for internal news. Due to the high visibility of these web sites, it is common to place more control over the release of new web pages or updates to existing pages. For this reason, SharePoint has publishing sites and communication sites.

TOPICS

- The types of pages found in SharePoint
- Classic SharePoint pages
- Modern SharePoint pages
- How to use classic team site pages
- Create news and site pages
- Review features of publishing sites
- Web parts
- Save, publish, share and delete pages
- Communication sites

Working with Apps

Apps are required to store information such as events, contacts and files in a site. SharePoint provides a selection of apps for different scenarios, all with the option to be customized for a specific business requirement. Apps can be broken down into Lists, Libraries and Market Place Apps. SharePoint lists serve as the structure for calendars, discussion boards, contacts, and tasks. This module explains the concept of lists, and then reviews popular options. A document library is a location on a site where you can create, collect, update, and share files including Word, Excel, PowerPoint and PDF. We will show you the benefits of using a library and teach you how best to work with files in a library. An introduction to on premises and SharePoint Marketplace apps is provided to show how to extend site functionality beyond what Microsoft has provided in the SharePoint Online platform.

TOPICS

- An introduction to apps
- Co-authoring
- Marketplace apps
- Check In - Out
- Adding apps to a site
- Edit and view file properties
- Create and manage columns
- Quick edit view
- Public and personal views
- File commands
- Managing app settings
- Copy link and Share
- Content approval
- Folders
- Major and minor versioning
- The recycle bin
- Document sets
- Alerts
- Working with files in a library
- OneDrive sync
- Create, Upload and edit files
- Working with classic lists

Building Processes with Flow and PowerApps

Building your business processes into SharePoint has been made simple and powerful with the introduction of code-free solutions to capture information and automate tasks. From SharePoint, discover Flow, a workflow designer that allows you to integrate lists and libraries into your other favourite Office 365 apps and business services. Additionally, we will show you PowerApps, a form designer that allows you to bring a tailored experience to your SharePoint lists, allowing users to document information from their web browser on their PC or even on a mobile app. This module is designed to show you the integration capabilities between SharePoint, Flow and PowerApps. We offer a full 2-day class for building Flow and PowerApp solutions that connect to other services. This module will also cover SharePoint's classic workflows, allowing users to build simple approval processes within lists and libraries.

TOPICS

- What are business processes?
- Design and publish a Flow
- Classic tools for designing processes
- Getting started with PowerApps in SharePoint
- Design and test a classic workflow
- Enhance data capture with PowerApps
- Getting started with Flow in SharePoint
- Test a Flow and PowerApps enriched list

Customising Security

Security is an important element of any site. You will see instructor-led demonstrations of the best practices for adding and removing colleagues from your site and defining their level of access. As a site owner, you can customise permission levels. This means that you can create levels of access that are aligned with the responsibilities of your sites users. An example of this would be allowing a group of users the ability to upload content but not delete content. You will also see how to use the Share button to quickly share documents with other users.

TOPICS

- Office 365 Group access
- Share a file
- Updating Office 365 Group Security
- Remove a user
- Managing access to SharePoint
- Customizing SharePoint security
- New sites private vs public
- Create permission levels and groups
- Setup access requests
- Security inheritance
- Share a site
- Security best practices

Working with Search

SharePoint provides the ability to store vast amounts of content in a variety of locations. This module covers a set of tools which help you to efficiently locate the information you need. In Office 365, as well as searching SharePoint, Delve offers a more personalized experience by identifying useful and trending content and bringing it to you. While SharePoint's search is rich and intelligent, site owners can make customisations to search to improve its relevance to an organisation. We will show common techniques used by site owners to improve search results by promoting specific content when a certain keyword is used.

TOPICS

Delve · Search tips · An introduction to SharePoint search · Accessing classic search · Search in folders, libraries and sites · Promoted results · Search results

Enterprise Content Management

Traditionally teams make use of file templates or manual processes to ensure information is collected and retained correctly. This may be a choice your team makes or a decision that is more universal across your organisation. In this module, we will help your team establish reusable file templates and automate document lifecycle management. An example of this would be removing old unwanted content from your site automatically. To achieve this, you will learn about a variety of SharePoint features including managed metadata, content types, policies, in-place records management and the content organizer.

TOPICS

- Managed metadata service
- Information management policies
- An introduction to content types
- The records center
- Create and manage content type
- In-place records management
- Deploy content types
- The content organizer
- Using content types in apps
- Durable links
- The content type hub

Practise What You Learn

#	MODULE	ACTIVITY
01	An Introduction to SharePoint Online	■ Introduction to SharePoint Online ■ Log in to Office 365 ■ Uploading to OneDrive ■ Customising your app launcher ■ Updating your Delve Profile
02	Creating Sites	■ Creating Sites ■ Create two sub sites ■ Delete a sub site ■ Restore a site ■ Update the navigation
03	Creating and Managing Web Pages	■ Create and Manage Web Pages ■ Tidy up the Training home page ■ Add rich content ■ Optional - Add a YouTube video
04	Working with Apps	■ Working with Apps ■ Creating a new library ■ Setting up columns and views ■ Uploading content ■ Setting up alerts and using versioning ■ Creating a list ■ Deleting and restoring an app
05	Building Processes with Flow and PowerApps	■ Building processes with Flow and PowerApps ■ Creating a new approval flow ■ Creating a new PowerApp ■ Initiating a business process
06	Customising Security	■ Customising Security ■ ShareContent in a library ■ Create new permission levels ■ Create a new security group ■ Add and remove users ■ Modifying inheritance of sites/apps

#	MODULE	ACTIVITY
07	Working with Search	■ Customising Security ■ Add staff to your site ■ Create permission levels and groups ■ Remove access for a user ■ Lock down to open up apps ■ Optional - Add the auditors to a workflow
08	Enterprise Content Management	■ Social ■ Post an update to the Training newsfeed ■ Update your profile

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig
