COURSE OVERVIEW

This course will introduce the audience to SharePoint Online Administration in Microsoft 365 and explain and demonstrate the configuration options for SharePoint Online. The course is appropriate for existing SharePoint on-premises administrators and new administrators to Microsoft 365 who need to understand how to correctly setup SharePoint Online for their company. The course will also help SharePoint on-premise administrators understand the differences between SharePoint on-premises and SharePoint Online. This course is designed for Administrators who need to setup, configure and manage SharePoint Online as part of their Microsoft 365 Administration.

WHO THIS COURSE IS FOR

SharePoint Administrators

Microsoft 365 Administrators

Site Collection Administrators

IT Administrators

PREREQUISITES

Required Prerequisites

- Understanding of cloud computing concepts (IaaS, PaaS, SaaS).
- Basic knowledge of Microsoft 365 Administration Center
- Awareness of Microsoft 365 security, compliance, and governance
- Familiarity with SharePoint Online UI, site collections, and permissions
- Basic understanding of document libraries, lists, metadata, and versioning

What You Will Learn

- Explain differences between SharePoint on-premises and SharePoint Online
- Configure site collections including storage, sharing and recovery
- Manage user profiles, audiences and managed metadata
- Build data connections using Power Apps, Power Automate and BCS
- Configure the term store and delegated administration
- Configure search including managed properties and result sources
- Manage the app catalog and monitor app usage
- Configure enterprise content management and compliance features

COURSE SYLLABUS

9 Modules, 102 Topics

01

6 Labs

Introduction to Microsoft 365 and SharePoint Online

TOPICS

- Configure preferred search center locations
- Defining read access permission levels
- Configuring newsfeed options
- Setup email notifications
- Configure my site cleanup

04**7 Labs**

Working with Data Connections

TOPICS

- Introduction to Data Connections
- Overview of Power Apps, Power Automate and Power BI
- Overview of the business connectivity service
- Introduction to BDC definition files
- Creating BDC definition files
- Introduction to the secure store service
- Configuring the secure store service
- Creating secure store target application settings
- Configure connections to cloud services
- Configure connections to on-premises services
- Tools to build data connections
- Creating external content types
- Building external lists using external data

05**4 Labs**

Managing the Term Store

TOPICS

- Overview of the term store
- Understanding terms and life cycle management
- Creating term groups
- Creating the term store
- Creating Term Sets in the UI
- Creating Term Sets via importing via a CSV
- Creating terms in the UI
- Creating terms via PowerShell and CSOM
- Manage terms with synonyms and pinning
- Configure delegated administration

06**3 Labs**

Configuring Search

TOPICS

- An Introduction to the search service
- Classic versus Modern search experience
- Understanding Managed Properties
- Create Managed Properties
- Manage Authoritative pages
- Understand Result sources
- Create and configure result sources
- Understand Query rules
- Promoting results through query rules
- Remove search results from the index
- Exporting search configurations
- Importing search configurations

07**5 Labs**

Configuring Apps

TOPICS

- An Introduction to Apps
- Understanding the App Catalog
- Building the App catalog
- Adding Apps to the catalog
- Add Apps to your SharePoint sites
- Adding Apps via the marketplace store
- Manage App licensing
- Configure store access settings
- Monitoring app usage

- Build and configure a records center
- Understanding the compliancy policy center
- Build a compliancy policy center and configure policies
- Discover the security and compliancy center
- Configure an eDiscovery center
- Build an eDiscovery case
- Understand data loss prevention
- Build a data loss prevention policy and query
- Working with classification and data governance

Manage Options for SharePoint Online

TOPICS

- Configure OneDrive features
- Configure use of Yammer or Newsfeeds
- Understand Information Rights Management
- Configure Information Rights Management
- Define site classification options
- Understand early release options for Microsoft 365
- Configure Early release options for your Microsoft 365 tenant
- Manage Access Control

HANDS-ON LABS

Practise What You Learn

#	MODULE	ACTIVITY
01	Introduction to Microsoft 365 and SharePoint Online	■ Create a new Outlook.com account ■ Create a new Microsoft 365 Trial ■ Install Azure Active Directory PowerShell ■ Install SharePoint Online Management Shell ■ Create test users ■ Install Office Apps for Enterprise on to your client
02	Working with Site Collections	■ Create a new site collection using the UI ■ Create a new Modern site collection ■ Create a new site collection using PowerShell ■ Configure Storage Quotas ■ Configure external sharing ■ Restore site collections ■ Create a site and deploy content for later labs
03	Working with Managed Metadata	■ Create a new custom user profile property ■ Create a custom property mapped to a metadata term ■ Create an Audience using profile properties and target content ■ Configure My Site cleanup accounts
04	Working with Data Connections	■ Create a new app in Power Apps ■ Create a new flow in Power Automate ■ Create a new report in Power BI ■ Create a new secure store application ■ Create a new BCS BDC connection ■ Create an external content type ■ Create a new external list to leverage the external data

#	MODULE	ACTIVITY
05	Managing the Term Store	■ Create a Term Group and Term Set ■ Manage Terms with PowerShell and CSOM ■ Manage Terms with synonyms and pinning ■ Configure delegated administration
06	Configuring Search	■ Create a query in modern and classic ■ Create a new result source ■ Export the search configuration
07	Configuring Apps	■ Create and configure an app catalog ■ Add an Microsoft 365 store app ■ Add an app via the app catalog ■ Add an Azure app ■ Monitor and Manage app usage
08	Enterprise Content Management in SharePoint Online	■ Configure In-Place Records Management ■ Create a Records Center ■ Create an eDiscovery case ■ Configure DLP
09	Manage Options for SharePoint Online	■ Configure OneDrive options ■ Define Site creation options ■ Configure Information Rights Management

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig
