HANDS-ON LABS

COURSE OVERVIEW

This course covers how to license client environments using Microsoft licensing metrics and terms and conditions, followed by licensing of server infrastructure. It then explains how to manage Microsoft software assets using the MAP (Microsoft Assessment and Planning) Toolkit to gather and interpret inventory data. Finally, it addresses how to combine installation data with license entitlements in the Volume Licensing Service Center (VLSC), and how to shape IT processes and define roles and responsibilities for software asset management.

WHO THIS COURSE IS FOR

Software Asset Managers

License Administrators

IT Asset Managers

IT Process Managers

LEARNING OBJECTIVES

- Apply Microsoft license metrics to client software
- Apply Microsoft license metrics to server software
- Identify data required for software asset management
- Use MAP Toolkit to gather installation data
- Interpret inventory data gathered from clients
- Use VLSC to find software license data
- Design roles and responsibilities for license management
- Plan IT processes to support asset management goals

4 Modules, 18 Topics

01

2 Labs

Effectively License Your Clients with Microsoft Software

This module introduces main Microsoft Licensing metrics, teaches students where to find the relevant terms and conditions and how to license their client environment with the help of example scenarios.

LESSONS

- Microsoft License Metrics for client software
- Licensing clients

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO:

- Correctly and efficiently license their client environment

02

2 Labs

Effectively License Your Servers with Microsoft Software

This module introduces main Microsoft Licensing metrics, teaches students where to find the relevant terms and conditions and how to license their server infrastructure with the help of example scenarios.

LESSONS

- Microsoft License Metrics for Server Software
- Licensing servers

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO:

- Correctly and effectively license their server environment

03

2 Labs

Microsoft License Management: Tools and Processes

This module explains how to manage Microsoft Software Assets with the help of the Microsoft tool MAP (Microsoft Assessment and Planning) Toolkit to create transparency within your IT infrastructure. It furthermore explains participants how to interpret information from the technical data about installations found on their clients and how to ensure a complete and comprehensive set of inventory data.

LESSONS

- **Software Asset Management:** which data is relevant and necessary?
- How to retrieve data about software installations with MAP Toolkit
- Interpretation of inventory data

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO:

- Know which data they need to gather in order to manage their Microsoft Software assets properly
- Use MAP Toolkit in order to gather all the data they need
- Interpret the data they gathered

Microsoft License Management: Processes

This module explains how to manage Microsoft Software Assets properly. Students learn how to combine information from the technical installations with the license entitlements and their management in the VLSC (Volume Licensing Service Center) of Microsoft. Additionally, this module teaches pupils how to shape and streamline their IT processes to support their Software Asset Management goals.

LESSONS

- **Microsoft License Management in Volume Licensing Service Center:** content and structure
- Core Software Asset Management processes for Microsoft Software Assets
- Roles and Responsibilities in License Management

AFTER COMPLETING THIS MODULE, STUDENTS WILL BE ABLE TO:

- Use the Microsoft Volume Licensing Service Center to find important data about their software licenses
- Design Roles and Responsibilities to allow for most effective licensing
- Shape related IT processes such that necessary information is available

HANDS-ON LABS

Practise What You Learn

#	MODULE	ACTIVITY
01	Effectively License Your Clients with Microsoft Software	■ License Metrics for Microsoft Client Software ■ Keeping Microsoft Client Licensing in balance
02	Effectively License Your Servers with Microsoft Software	■ Licensing Metrics for Microsoft Server Software ■ Keeping Microsoft Client Licensing in balance
03	Microsoft License Management: Tools and Processes	■ Necessary data for Software Asset Management ■ Data gathering and interpretation
04	Microsoft License Management: Processes	■ Software Asset Management Data from VLSC ■ Process structures

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.
