

KOENIG SOLUTIONS • COURSE OUTLINE

Power Platform Dataverse

Learn to build Dataverse solutions, from tables and relationships to security roles and model-driven apps.

COURSE OVERVIEW

This course covers building solutions and tables in Dataverse, including managed and unmanaged solutions, table types and advanced table options. It then addresses creating columns, working with data types and understanding relationships between tables. Forms, views and security configuration follow, covering business units, teams, security roles, column level security and the hierarchy security model. The course concludes with creating a model-driven app.

WHO THIS COURSE IS FOR

Dataverse Developers

Power Platform Developers

Business Analysts

System Administrators

App Makers
