

KOENIG SOLUTIONS · COURSE OUTLINE

Mastering Excel Dashboards

Learn to build, format and share Excel dashboards using Pivot Tables, charts, macros and external data.

16 Hours

DURATION

15

MODULES

36

TOPICS

COURSE OVERVIEW

This course covers from fundamental concepts to advanced techniques in Excel dashboard creation. This course not only establishes a solid understanding of essential dashboard principles and data structuring best practices but also equips participants with the skills to construct pivotal components such as Pivot Tables, charts, and dynamic labeling. As the course progresses, participants learn to enhance efficiency through macros, design user-friendly interfaces, integrate external data seamlessly, and employ diverse methods for sharing and presenting Excel dashboards. By the end of the course, participants will possess a well-rounded skill set, empowering them to proficiently create, optimize, and share impactful Excel dashboards.

WHO THIS COURSE IS FOR

Data Analysts

Report Developers

Business Analysts

Financial Analysts

Excel Users

LEARNING OBJECTIVES

By the end of this module, participants will be able to:

- Foundational Understanding: Grasp key concepts and ground rules for creating effective dashboards and reports
- Data Structure and Layout Optimization: Recognize the impact of data structure on dashboards
- Data Structure and Layout Optimization: Apply best practices for setting up source data
- Basic to Advanced Dashboard Components: Master Pivot Tables, Excel charts, and dynamic labeling
- Basic to Advanced Dashboard Components: Explore advanced components for trend representation and data grouping
- Efficient Reporting with Macros and Interactive Interfaces: Leverage macros for automation and efficiency
- Efficient Reporting with Macros and Interactive Interfaces: Design user-friendly interfaces for enhanced interaction
- External Data Integration and Effective Sharing: Incorporate external data sources into Excel
- External Data Integration and Effective Sharing: Learn diverse methods for sharing and presenting Excel dashboards and reports

15 Modules, 36 Topics

01

Introduction to Dashboards and Report Fundamentals

OVERVIEW OF DASHBOARDS AND REPORTS

- Introduction to the central theme of dashboards and reports
- Exploration of the fundamental concepts underlying effective dashboard and report creation

FOUNDATIONAL PRINCIPLES

- Acquaintance with key fundamentals that form the basis of successful dashboard design
- Understanding basic ground rules essential for creating impactful dashboards and reports

02

Crafting a Super Model for Effective Dashboards

EXPLORING DATA CONCEPTS

- Delve into crucial concepts surrounding data structure and layout
- Understand the impact of poorly planned data sets on dashboard effectiveness

BEST PRACTICES FOR SOURCE DATA

- Demonstration of the importance of well-structured source data
- Practical insights into best practices for setting up source data to optimize dashboards and reports

03

Mastering Pivot Tables for Dynamic Dashboards

You take an in-depth look at some of the basic dashboard components you can create using Excel.

INTRODUCTION TO PIVOT TABLES

- Comprehensive introduction to pivot tables and their pivotal role in Excel-based dashboards
- Understanding the integral functions of pivot tables in data analysis and visualization

04

Excel Chart Essentials for Beginners

BUILDING A FOUNDATION WITH EXCEL CHARTS

- Providing beginners with a primer on constructing charts in Excel
- Offering a solid understanding of the fundamental workings of Excel charts

05

Leveraging Conditional Formatting for Enhanced Dashboards

EXPLORING ENHANCED FORMATTING TOOLS

- Introduction to the new and improved conditional formatting functionality in Excel
- Practical ideas for utilizing advanced conditional formatting tools in the context of dashboards and reports

06

Mastering the Art of Dynamic Labeling

EXPLORATION OF DYNAMIC LABELING TECHNIQUES

- In-depth exploration of diverse techniques for creating dynamic labels
- Enabling the creation of an additional layer of visualization for enhanced dashboard effectiveness

07

Trend Visualization in Dashboards

You go beyond the basics to look at some of the advanced components you can create with Excel. This part consists of three chapters.

REPRESENTATION OF TIME TRENDS

- Comprehensive demonstration of techniques to depict time trends in dashboards
- Exploration of showcasing seasonal trends, moving averages, and various trending types
- Introduction to Sparklines for enhanced trend visualization

08

Effective Data Grouping and Bucketing Techniques

EXPLORATION OF DATA BUCKETING METHODS

- In-depth exploration of diverse methods for grouping and bucketing data for reporting
- Practical insights into organizing and presenting data in a structured manner

09

Displaying Performance against Targets

CHARTING TECHNIQUES FOR GOAL MEASUREMENT

- Demonstration of charting techniques to effectively display and measure values against goals
- Practical insights into visualizing performance metrics in a goal-oriented context

10

Macro-Charged Reporting

LEVERAGING MACROS FOR REPORTING EFFICIENCY

- Providing a clear understanding of how macros can be utilized to supercharge and automate reporting systems
- Practical insights into optimizing reporting processes through macro functionalities

11

Creating Interactive User Interfaces

DESIGNING USER-FRIENDLY INTERFACES

- Illustration of creating simple interfaces for clients to navigate and interact with reporting systems
- Practical insights into enhancing user experience and engagement with reporting interfaces

12

Incorporating External Data into Dashboards

Is importing and exporting information to and from Excel.

EXPLORATION OF EXTERNAL DATA INTEGRATION

- In-depth exploration of methods to incorporate data not originating in Excel
- Practical guidance on importing data from external sources
- Introduction to creating systems enabling dynamic refreshing of external data sources

13

Distribution and Presentation Strategies

EFFECTIVE SHARING AND PRESENTATION TECHNIQUES

- Comprehensive exploration of various methods to distribute and present Excel dashboards and reports
- Practical insights into optimizing the sharing process for enhanced collaboration and communication

14

Chart Design Mastery

Is the classic Part of Tens section. The chapters found here each present ten or more pearls of wisdom, delivered in bite-sized pieces.

TEN CHART DESIGN PRINCIPLES

- Comprehensive exploration of ten chart-building best practices
- Practical insights to aid in designing more effective and visually compelling charts

Pre-Distribution Checklist

In these final modules, participants will hone their skills in chart design, delving into principles that enhance the visual impact of charts. Additionally, Module 15 provides a checklist of crucial questions to ensure participants are well-prepared before sharing their Excel dashboards and reports, emphasizing quality and effectiveness in distribution. These modules serve as a culmination of the course, imparting valuable insights for creating impactful visualizations and ensuring the success of shared Excel work.

TEN QUESTIONS BEFORE DISTRIBUTION

- In-depth checklist of ten critical questions to ask before sharing Excel dashboards and reports
- Practical guidance to ensure the quality, accuracy, and effectiveness of distributed work

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Hands-on exercises throughout the course
- Delivery by certified instructors and subject matter experts
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.
