TOPICS

COURSE OVERVIEW

This course covers the fundamentals of Power Platform administration, starting with administrator roles and the Power Platform admin center. It then addresses environment strategies including setup, lifecycle management and governance, followed by managing Dataverse storage and capacity. Data Loss Prevention policies and environment and Dataverse security, including audit log management and compliance, are then examined. The course concludes with the Centre of Excellence Toolkit for governance and monitoring.

WHO THIS COURSE IS FOR

Power Platform Administrators

System Administrators

IT Administrators

Environment Administrators

Compliance Officers

PREREQUISITES

- The participants should have a good understanding of Microsoft Power Platform and its core components (Power Apps, Power Automate, Power BI) and familiarity with general IT administration and governance concepts.

LEARNING OBJECTIVES

- Identify administrator roles and responsibilities in Power Platform
- Explain how to use the Power Platform admin center
- Apply environment strategies for setup, backup and recovery
- Manage Dataverse storage capacity and monitor usage
- Configure Data Loss Prevention policies to secure environments
- Implement security roles, permissions and audit log management
- Describe compliance best practices for Power Platform environments
- Plan governance and monitoring using the Centre of Excellence Toolkit

6 Modules, 22 Topics

01

Introduction to Power Platform Administration

TOPICS

- Overview of Power Platform
- Key roles and responsibilities for administrators
- Introduction to the Power Platform admin center
- Use the Microsoft 365 admin center to manage your subscription

02

Environment Strategies

TOPICS

- Setting up and managing environments in Power Platform
- Delete, Reset, Recover, Reset, Copy, Backup and Restore Env
- Administration mode
- Environment security and governance
- Managing environment lifecycles

03

Managing Dataverse Capacity

TOPICS

- Understanding Dataverse storage and capacity
- Capacity monitoring and management
- Addressing capacity limitations, auditing and alerts

04

Data Loss Prevention (DLP) Policies

TOPICS

- Introduction to Data Loss Prevention (DLP)
- Setting up DLP policies to secure environments
- Best practices for data governance in Power Platform

05

Security in Environments and Dataverse

TOPICS

Securing environments and data in Dataverse · Managing security roles and permissions · Audit Log Management · Best practices for ensuring compliance

06

Centre of Excellence (CoE) Toolkit

TOPICS

- Overview of the Centre of Excellence Toolkit
- Key features of the CoE Toolkit
- Implementing CoE for governance and monitoring

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.
