MS-4002: Prepare Security and Compliance to Support Microsoft 365 Copilot

Learn to prepare security, compliance and access controls in Microsoft 365 to support Copilot deployment and extensibility.

1 Day

DURATION

7

MODULES

COURSE OVERVIEW

This course is designed to prepare students to take the corresponding Applied Learning Skills, APL-4002: Prepare security and compliance to support Microsoft 365 Copilot. This one-day course is composed of a single Learning Path: LP1: Prepare security and compliance to support Microsoft 365 Copilot. Module 1 explores how to implement Microsoft 365 Copilot. You learn how to prepare data searches for Copilot, how to assign Microsoft 365 Copilot licenses, and how to drive Copilot adoption. You're also introduced to the basic components of Microsoft 365 Copilot extensibility. This module is reused from the old MS-4006 course (Microsoft 365 Copilot for Administrators), which has been retired and is being replaced with this new MS-4002 course. Modules 2 through 6 are existing published training content from the MS-102 (Microsoft 365 Administrator) course. We selected key modules and labs from MS-102 that focus on data security and compliance in Microsoft 365. Since Microsoft 365 Copilot is integrated into Microsoft 365, it adheres to all existing privacy, security, and compliance commitments to Microsoft 365 commercial customers. So rather than reinvent the wheel with all new training content, this course reuses the key MS-102 training content related to data security and compliance. The final Module 7 is reused from MS-4017 (Manage and extend Microsoft 365 Copilot). This module covers, among several topics, how to create a connection between a data source and a Microsoft Graph connector, which is one of the focuses of APL-4002.

WHO THIS COURSE IS FOR

Microsoft 365 Administrators

Security Administrators

Compliance Administrators

IT Professionals

Copilot Administrators

PREREQUISITES

Audience prerequisites

- Optionally completed a role-based administrator course such as Messaging, Teamwork, Security and Compliance, or Collaboration.
- Basic functional experience with Microsoft 365 services.
- A proficient understanding of general IT practices.
- A working knowledge of PowerShell.
- Basic understanding of Microsoft 365 Copilot.

7 Modules

01

Implement Microsoft 365 Copilot

02

Manage Secure User Access in Microsoft 365

03

Manage Permissions, Roles, and Role Groups in Microsoft 365

04

Deploy Microsoft 365 Apps for Enterprise

05

Implement Microsoft Purview Data Loss Prevention

06

Implement Sensitivity Labels

07

Manage Microsoft 365 Copilot Extensibility

WHAT IS INCLUDED

Everything You Need to Succeed

- Koenig course material for every module
- Delivery by certified instructors and subject matter experts
- Hands-on exercises throughout the course
- Course completion certificate from Koenig

ABOUT KOENIG

Who We Are

Established in 1993, Koenig Solutions is a globally recognised training provider with 35+ technology partnerships, 5,000+ training programmes and a network of certified instructors and subject matter experts, supporting individuals and enterprise teams worldwide.
