COURSE OVERVIEW

This course covers importing photos into a Lightroom catalog, storing and organising them, and finding photos within the catalog. It then explains the roundtrip workflow between Lightroom and Photoshop, including sending raw, JPEG, TIFF and Smart Object files for editing. It covers combining photos in Photoshop to create collages, group shots, HDR images and panoramas, along with selection and masking techniques using shape, colour, Focus Area, Select and Mask, and channels. It concludes with retouching techniques in Photoshop, including content removal, content moving, skin smoothing and portrait sculpting with the Liquify filter.
